

**IMPACT ASSESSMENT OF LNG TERMINAL AUGMENTATION
PROJECT BY M/S PLL ON THE TERRESTRIAL FLORA
AND FAUNA AT PUTHUVYPEEN, KERALA**

Final Report

Project Team:

Dr. Arun P R, Dr. Azeez P A, Dr. Murugesan M & Dr. Nikhil Raj P P

Declaration

Updation of EIA for Augmentation Project of LNG Terminal at Puthuvypeen-
Kochi, Kerala

I hereby certify that I was part of the EIA team in the following capacity that developed this EIA.

Functional Area of Expert: Ecology & Biodiversity

Period of involvement: June, 2011 to September, 2011

Tasks: Supervision of collection of data on flora & fauna and impact assessment & management plan preparation. Specific review w.r.t. drainage pattern for impact assessment on mangroves, other flora & fauna.

Name: Parappurath Abdul Azeez

Contact Details: 9442013942

1 Introduction

Energy is one of the primary requisites for the economic development and the energy security is the prime concerns among countries all over the world. In a developing country like India where the energy sector is struggling to cope with the ever increasing demand and pollution from traditional fuels necessitate large scale investment in exploring new avenues of cleaner energy. The Rapid economic expansion is continuously hits on India's energy needs. The Natural gas is increasingly being looked upon as a cleaner alternate fuel with minimal environmental impacts. According to some recent estimates, Natural gas meets 23% of worlds energy needs.

The LNG terminal and regasification facility presently being developed by M/s Petronet LNG Ltd. (PLL) at Puthuvypeen would facilitate import, storage, regasification, and distribution of Liquefied Natural Gas (stored at around -165°C). The LNG will be imported via sea route through special LNG tankers from Qatar. The terminal is expected to cater to the growing needs of industrial and power sectors of Kerala. The project is expected to be a big boost to Kerala's economy and the state-based companies like Fertilisers and Chemicals Travancore Ltd (FACT) and Kayamkulam Thermal Power Plant of NTPC will benefit from the high availability of LNG. As per the initial plan, for which the environmental clearance has already been obtained by PLL (existing consent no.PCB/CE/R5/1446/2008 dated 17.05.2010), two insulated LNG tanks each of 10,000 m³ capacity are being built at Puthuvypeen site along with associated port and regasification facilities and are in the advanced stage of completion.

Due to change in market scenario M/S PLL plan to expand this LNG re-gasification facility from the existing 2.5 MMTPA to 5 MMTPA, comprising of additional two heat exchangers and connected pumps and flow meters.

There will be no additional land or storage tank requirements for this expansion.

1.1 PRESENT STUDY

The present short term study was taken up to collect and updates the baseline environmental data on the terrestrial flora and fauna around the LNG terminal project by Petronet LNG Ltd., as part of the environmental clearance requirements. The present study was of 3 months duration starting from July 2011. Further to the initial reconnaissance survey, the area falling within 10km radial distance on the landward side was marked on the satellite imageries and was divided into four equal sectors and further into eight sub sections for convenience of stratification of sampling efforts as detailed under methodology section.

1.2 METHODOLOGY

The area under 10 km radial distance from the LNG terminal selected for the present study was marked on the Survey of India (SOI) topographic maps and google earth imageries. Since the proposed project is located along the coast line bordering Arabian Sea, only 50% of the 10km radial distance zone comes in the landward side. The study area was delineated by taking the proposed LNG project area at Puthuvypeen as the centre and plotting two circles of radii 5 and 10 km respectively. For effective representative sampling of the area, the semicircular area of 10km diameter on landward side was further subdivided into 4 equal sectors with 3 radial lines at 45° angular distances as shown in the map (Figure 1). A significant proportion of this study area was covered by water bodies mainly backwater channels.

The study area was thus demarcated into eight distinct sections. Two sections each falling along four different directions from the project site; ie. towards North (N1 & N2), North-east (NE1 & NE2), South-east (SE1 & SE2) and South

(S1 & S2). With the aid of the topographic maps and the latest imageries available in GoogleEarth, sample points were selected randomly in each of the eight blocks.

Floral and faunal surveys were carried out in all the randomly selected plots of each block. Visual Encounter Survey (VES, search) was carried out for documenting the herpetofauna. The identification of herpetofauna was done with the help of Das and Dutta (1998) for amphibians and Das (1997) for reptiles. The bird survey were done following Herzog *et al* (2002). Birds were recorded by direct sighting and calls. We followed the nomenclature and taxonomic sequence of Grimmett *et al.* (2000). Similarly quadrats of 10 x 10 m size were laid in the randomly selected areas to study the plant species using standard methods as described under the Flora section of this report.

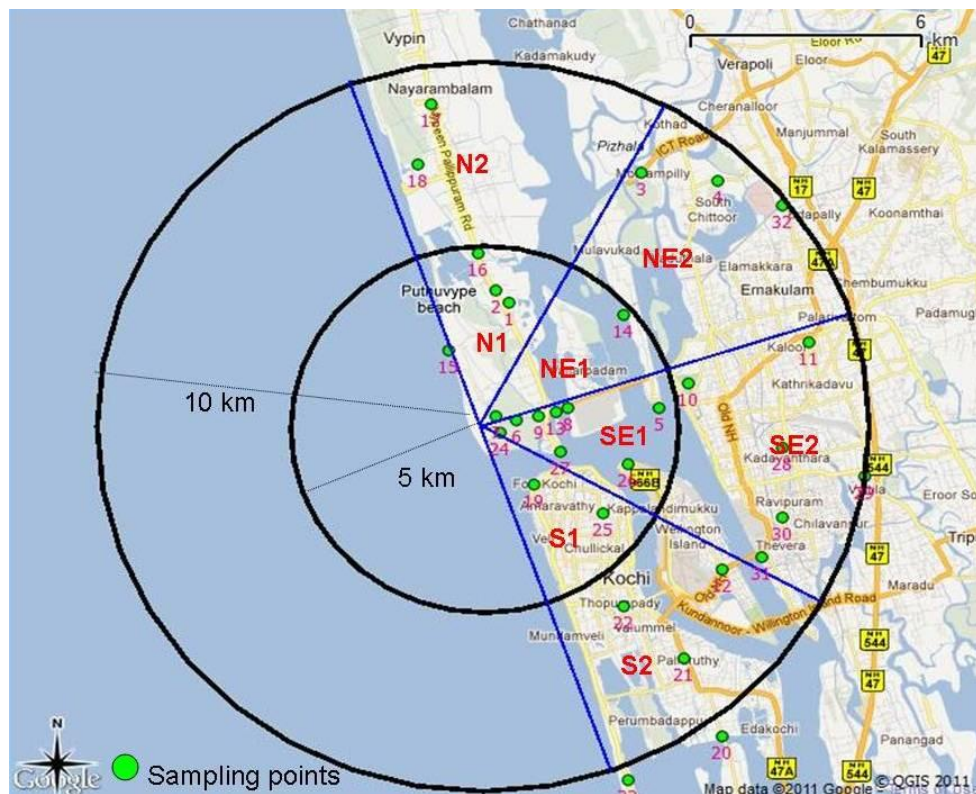

Figure 1. Map showing the sampling design and location of sampling sites

Quadrats of 10 x 10 m size were laid in the randomly selected areas to study the plant species using standard methods as described under the Flora section of this report.

The present status of mangrove vegetation in the study area was assessed using direct observations and recent satellite imageries and was compared with historical imageries of the area since the year 2002 to understand the changes happened to this sensitive ecosystem over the recent past and the causative factors responsible for the same.

Table 1 Geographic location of sampling points

1.3 LEGISLATIVE FRAMEWORK

There is a strong set of environmental rules and regulations existing in India. Of these, the Environmental protection act (1986), Coastal Regulation Zone (CRZ) notification (2011) and EIA notification (2006) would specifically apply to the LNG terminal project at Puthuvypeen.

Government of India has declared the coastal stretches of the country as Coastal Regulation Zone, and regulated the developmental activities along this stretch considering its importance as unique habitat for marine animals, livelihood security for the fisher community and the local communities dependent on these natural systems. Further to this the Ministry of Environment and Forests, (MoEF, GOI) also recommends EIA clearance before the commencement of any developmental activities in the CRZ.

A State notification dated 14th October 2005 issued by the Government of Kerala (GOK) also restricts activities within 50m distance from the mangrove forests. The notification specifically restricts constructions of pipelines in 50m vicinity of mangrove and other forest areas. The notification also recommended an EIA study assessing the risk to the local environs from the proposed activities.

The necessary clearances from the concerned regulatory authorities are already available with the project proponent (PLL) for the Puthuvypeen LNG facility. The present study specifically examined the proposed augmentation proposal of the LNG terminal from the initial 2.5 MMTPA capacity to 5 MMTPA. The present augmentation proposal by PLL does not require any

additional land nor would it lead to higher emissions or water requirement. A certification by the proponent in this regard may be required to be submitted to the regulatory authority for obtaining the necessary clearances as per the EIA notification 2006 (and subsequent amendments).

2 Baseline status of terrestrial Biodiversity

2.1 FAUNA

The Kochi metropolis is among the highly populated urban centres in the state of Kerala. The Kochi and its surrounding areas are dominated by backwaters and associated wetlands, mainly, tributaries and distributaries of Vembanadu lake, the largest lake of Kerala. This vast network of wetlands comprising of stretches of paddy fields, aquaculture fields, coastal wetlands and mangroves along with small temple ponds, parks and house gardens in and around Kochi metropolis provide diverse habitats for various species of animals and plants.

The area falling within 10 km radial distance around the study area was demarcated into eight sections for convenience of representative sampling of flora and fauna as shown in the Figure 1.

2.1.1 AVIFAUNA

The area has a good population of birds with 57 species of birds observed during the present study (Table 2). Species such as House Crow (*Corvus splendens*), Little Cormorant (*Phalacrocorax niger*), Darter (*Anhinga melanogaster*), Black Kite (*Milvus migrans*), Brahminy Kite (*Haliastur indus*), Common Myna (*Acridotheres tristis*), Indian Pond-heron (*Ardeola grayii*), Indian Cormorant (*Phalacrocorax fuscicollis*), Little Egret (*Egretta garzetta*), and Intermediate Egret (*Mesophoyx intermedia*) were common in almost of all the sampling points (Figure 2 & Figure 3).

Among the birds, Ashy Drongo (*Dicrurus leucophaeus*), Chestnut-tailed Starling (*Sturnus malabaricus*), Common Sandpiper (*Actitis hypoleucos*), Common Redshank (*Tringa totanus*), Grey Heron (*Ardea cinerea*), Marsh Sandpiper (*Tringa stagnatilis*) are seasonal visitors to the area.

Figure 2 Encounter rate of Little Cormorant (*Phalacrocorax niger*) and House Crow (*Corvus splendens*) at Gundu Island

Figure 3 Encounter rate of Common Myna (*Acridotheres tristis*) at Moolampilli

According to secondary sources, Greenish Warbler (*Phylloscopus trochiloides*), Blyth's Reed-Warbler (*Acrocephalus dumetorum*), Wood Sandpiper (*Tringa glareola*), Common Greenshank (*Tringa nebularia*) and Marsh Sandpiper (*Tringa stagnatilis*) are reported as the winter visitors in the area (Azeez and Bhupathy, 2006; Nameer 2010 Appendix 1)

The wetland species like Little Cormorant (*Phalacrocorax niger*), Darter (*Anhinga melanogaster*), Indian Pond-heron (*Ardeola grayii*), and Black-headed Ibis (*Threskiornis melanocephalus*) are the most sighted species in the sampling points located in the northern parcel of the study plot. On the other hand southern portion is dominated equally by both urban (House crow

(*Corvus splendens*) and wetland species such as Little Cormorant (*Phalacrocorax niger*). The bird species in the north eastern side of the study plot are dominated by Brahminy Kite (*Haliastur Indus*), House Crow (*Corvus splendens*), Little Cormorant (*Phalacrocorax niger*) etc. In general the species sighted in the first 5 km (radial) area of the present study plot are more wetland dependent or wetland associated, and those present in the next (5km-10km radius) are more urban birds.

The mangrove vegetation and associated mudflats provides crucial habitats for various wetland birds many of which are migratory. However, rapid and haphazard developmental activities in and around the Vypeen and adjacent areas is fast consuming the remaining natural areas. The migratory species of birds observed in the study area also found distributed in the beaches and areas surrounded by aplenty of water bodies. The urban sprawl happening in the Kochi metropolis and the developmental activities in the form of roads and rail roads catering the transportation facilities of the newly opened factories and giant projects in the Vypeen and Puthuvypeen areas will be a threat for these species. It is evident that the loss of the wetlands and associated habitats will prevent the migration of the visitors in the coming future.

Table 2 List of birds recorded during the study period

| | Common Name | Scientific Name |
|----|---------------------------|------------------------------------|
| 1 | Ashy Drongo | <i>Dicrurus leucophaeus</i> |

| 23 | Common Sandpiper | <i>Actitis hypoleucos</i> |
| 24 | Common Tailorbird | <i>Orthotomus sutorius</i> |
| 25 | Cotton Pygmy-goose | <i>Nettapus coromandelianus</i> |
| 26 | Crimson Sunbird | <i>Aethopyga siparaja</i> |
| 27 | Darter | <i>Anhinga melanogaster</i> |
| 28 | Fulvous Whistling-duck | <i>Dendrocygna bicolor</i> |
| 29 | Greater Coucal | <i>Centropus sinensis</i> |
| 30 | Greater racket-tailed Drongo | <i>Dicrurus paradiseus</i> |
| 31 | Grey Heron | <i>Ardea cinerea</i> |
| 32 | House Crow | <i>Corvus splendens</i> |
| 33 | House Sparrow | <i>Passer domesticus</i> |
| 34 | Indian Cormorant | <i>Phalacrocorax fuscicollis</i> |
| 35 | Indian Pond-heron | <i>Ardeola grayii</i> |
| 36 | Indian Robin | <i>Saxicoloides fulicata</i> |
| 37 | Intermediate Egret | <i>Mesophoyx intermedia</i> |
| 38 | Jungle Myna | <i>Acridotheres fuscus</i> |
| 39 | Large-billed Crow | <i>Corvus macrorhynchos</i> |
| 40 | Little Cormorant | <i>Phalacrocorax niger</i> |
| 41 | Little Egret | <i>Egretta garzetta</i> |
| 42 | Little Grebe | <i>Tachybaptus ruficollis</i> |
| 43 | Little Heron | <i>Butorides striatus</i> |
| 44 | Oriental Magpie -Robin | <i>Copsychus saularis</i> |
| 45 | Pale-billed Flowerpecker | <i>Dicaeum erythrorhynchos</i> |
| 46 | Pallas's fish- Eagle | <i>Haliaeetus leucoryphus</i> |
| 47 | Pied Kingfisher | <i>Ceryle rudis</i> |
| 48 | Plain Prinia | <i>Prinia inornata</i> |
| 49 | Purple Heron | <i>Ardea purpurea</i> |
| 50 | Purple Sunbird | <i>Nectarinia asiatica</i> |
| 51 | Red-wattled Lapwing | <i>Vanellus indicus</i> |
| 52 | Rock Pigeon | <i>Columba livia</i> |
| 53 | Rose-ringed Parakeet | <i>Psittacula krameri</i> |
| 54 | Rufous Woodpecker | <i>Dryocopus hodgei</i> |
| 55 | Stork-billed Kingfisher | <i>Halcyon capensis</i> |
| 56 | White-breasted Waterhen | <i>Amaurornis phoenicurus</i> |
| 57 | White-cheeked Barbet | <i>Megalaima viridis</i> |
| 58 | White-throated Kingfisher | <i>Halcyon smyrnensis</i> |

The northern parts of the study area belonging to the sections N1 and N2 were dominated by aquaculture wetlands, coastal wetlands, and coconut groves. The N1 section also had urban pockets adjoining the wetland areas. The recent establishment of large-scale developmental projects and associated development of road/rail connectivity to Puthuvypeen area have accelerated the urbanization pressure at N1. The N2 section, on the other hand is less populated with large area under aquaculture practices. However, on the either side of the Vypeen- Pallipuram road, which is going across the Northern sections (N1 & N2), is thickly populated. The major bird species observed in the N1 and N2 parcels are listed in the Table 3 & Table 4. The area especially the mangrove patches is found to harbour animals such as Common Mongoose (*Herpestes edwardsi*), Bengal Fox (*Vulpes bengalensis*) and Asian Palm Civet (*Paradoxurus hermaphroditus*).

| Chestnut-tailed Starling | <i>Sturnus malabaricus</i> |

Mainly, distributaries of Vembanad lake and paddy fields form the north-eastern (NE) sections of the study area (NE1 & NE2). The NE1 is less populated compared to the NE2, where the urban pressure from the city centre is severe. The establishment of new roads especially the ICT road across the NE2 parcel has contributed to major disturbances to the wetlands. The area falling under NE1 includes parts of Vallarpadam Island, Vypeen and Puthuvypeen areas. The area has mangrove patches along the wetlands that provide feeding and breeding grounds for many organisms. Bird species such as Oriental Magpie Robin (*Copsychus saularis*), Jungle Myna (*Acridotheres fuscus*) and Black Kite (*Milvus migrans*) are some of the common bird species observed from various sampling sites of NE1. Similarly White-breasted Waterhen (*Amaurornis phoenicurus*), Common Moorhen (*Gallinula*

chloropus) and Red-wattled Lapwing (*Vanellus indicus*) were some of the common bird species encountered at NE 2 (See also Table 5 & Table 6)

Table 5 Common bird species observed in various sampling points of parcel NE1

| Common Name | Scientific Name |
|---------------------------|-----------------------------|
| Oriental Magpie -Robin | <i>Copsychus saularis</i> |
| Jungle Myna | <i>Acridotheres fuscus</i> |
| Black Kite | <i>Milvus migrans</i> |
| House Crow | <i>Corvus splendens</i> |
| Large-billed Crow | <i>Corvus macrorhynchos</i> |
| Ashy Prinia | <i>Prinia socialis</i> |
| Rock Pigeon | <i>Columba livia</i> |
| Common Sandpiper | <i>Actitis hypoleucos</i> |

| Little Cormorant | <i>Phalacrocorax niger</i> |
| White-throated Kingfisher | <i>Halcyon smyrnensis</i> |
| Indian Pond-heron | <i>Ardeola grayii</i> |
| House Crow | <i>Corvus splendens</i> |

The south-eastern (SE) parts of the study area comprised of parts of Puthuvypeen, Fort Kochi, Vallarpadam, and the Vembanadu Lake. The SE1 parcel has good stretches of mangrove vegetation in and around Puthuvypeen area. Bird species recorded from SE1 area include Little Grebe

(*Tachybaptus ruficollis*), Darter (*Anhinga melanogaster*) and Black-crowned night Heron (*Nycticorax nycticorax*) (Table 7). The SE2 encompass some of the serene areas of the Kochi metro such as Bolgatty palace, and the Mangalavanam bird sanctuary. Observations made during the survey and data from various secondary sources (Nameer, 2010 and personal interactions with the local people) indicated that the area supports mammalian species such as Common Palm Squirrel (*Funambulus palmarum*), Indian Flying-fox (*Pteropus giganteus*), Asian Palm Civet (*Paradoxurus hermaphroditus*). Reptiles such as Indian Rat Snake (*Ptyas mucosus*), Keeled Grass Skink (*Eutropis carinata*), Chameleon (*Chamaeleo zeylanicus*) and birds such as Black Kite (*Milvus migrans*), Common Myna (*Acridotheres tristis*), Brahminy Kite (*Haliastur indus*) and Little Heron (*Butorides striatus*) were also observed from the area (Table 8).

| House Crow | <i>Corvus splendens</i> |

Mattancherry and the Fort Kochi regions formed the southern portion (Section S) of the study area. The area is highly populated in the S1 region while in the S2 region the built-up area was comparatively less. The Mattancherry is one of the tourist destinations of the Kochi Corporation and is a well known trade centre in the western coast of India during the historical times. Bird species such as Greater Coucal (*Centropus sinensis*), House Crow (*Corvus splendens*), Ashy Prinia (*Prinia socialis*), Little Cormorant (*Phalacrocorax niger*) etc. are observed from the S1 region. The S2 region on the other hand is comprised of Paddy fields, lakes and open lands which support species such as Little Grebe (*Tachybaptus ruficollis*), Darter (*Anhinga melanogaster*), Indian Pond-heron (*Ardeola grayii*), Black-headed Ibis (*Threskiornis melanocephalus*) etc (Table 9 & Table 10)

2.1.2 OTHER FAUNA

The present study recorded 5 species of Reptiles and 5 species of mammals from various locations. No amphibian species were recorded during the study period. However, referring to various reports/ secondary sources we have furnished check lists of animals that are reported from the area observed from the study site in the following tables.

Table 11 List of Amphibians as reported (Azeez et al (2004))

| Common Name | Scientific Name |
|---------------------------------------|--------------------------------|
| Bull Frog | <i>Haplobatrachus crassus</i> |
| Cricket Frog | <i>Limnonectes limnocharis</i> |
| Bush Frog | <i>Phylluatus sp. (E)</i> |
| Toad | <i>Bufo melanostictus</i> |
| E - Endemic taxa to the Western Ghats | |

Table 12 List of Reptiles from the study area

| Common Name | Scientific Name |
|---------------------------|--------------------------------------|
| Indian Black Turtle* | <i>Melanochelys trijuga</i> (A) |
| Indian Flapshell Turtle* | <i>Lissemys punctata</i> (A) |
| Dwarf Gecko* | <i>Cnemaspis sp.</i> (E) |
| Indian House Gecko | <i>Hemidactylus frenatus</i> |
| Indian Garden Lizard | <i>Calotes versicolor</i> |
| Green Calotes | <i>Calotes calotes</i> |
| Indian Skink | <i>Mabuya carinata</i> |
| Dussumier's Litter Skink* | <i>Sphenomorphous dussumieri</i> (E) |
| Cat Skink* | <i>Ristella sp.</i> (E) |
| Spotted Supple Skink* | <i>Riopa punctata</i> |
| Water Snake* | <i>Xenochrophis piscator</i> (A) |
| Indian Rat Snake | <i>Ptyas mucosus</i> |
| Bi-spectacled Cobra* | <i>Naja naja</i> (V) |
| Sea Snake -(V) * | ---- |

*reported by Azeez *et al* (2004)

Table 13 Mammals recorded in the study area

| Common Name | Scientific Name |
|-----------------------------|-----------------------------------|
| Common mongoose | <i>Herpestes edwardsii</i> |
| Bengal Fox | <i>Vulpes bengalensis</i> |
| Asian palm civet | <i>Paradoxurus hermophroditus</i> |
| Three-striped Palm Squirrel | <i>Funambulus palmarum</i> |
| Flying-fox | <i>Pteropus giganteus</i> |
| Common otter | <i>Lutra lutra</i> |

2.1.3 BUTTERFLIES

The butterflies present in and around the study area were documented by direct observations, random walk and opportunistic observations, by using a pair of binoculars for identification whenever required. The morning and evening hours when maximum butterfly activity was at its peak were used for butterfly sampling (mostly 7 to 11 am and 3 to 6 pm). Butterfly survey was carried out by searching 5 m distance on either side of the pathway.

Gunathilagaraj et al. (1998), Kunte (2000) and Kehimkar (2008) were referred for the identification of Butterflies.

A total number of 49 butterfly species falling under 33 genera and spreading over 5 families were recorded during the present study period (Table 14). At family level, the family Nymphalidae is the dominant with 21 species (43%) followed by Pieridae with 11 species (23%), Papilionidae with 10 species (20%) and Hesperiiidae with 4 species (8%). The least number of butterfly species were recorded in the family Lycaenidae with 3 species (6%).

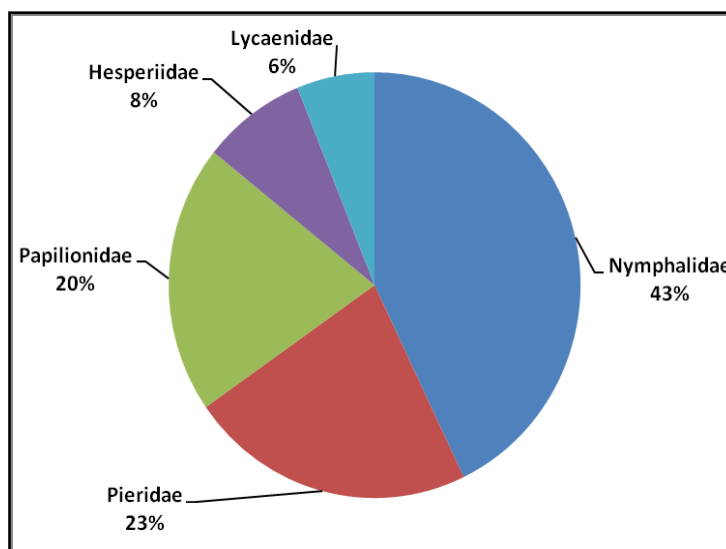

Figure 4 Family-wise distribution of the butterflies in the study area

Butterflies such as Common Castor, Common Emigrant, Common Mormon, Grey Pansy, Southern Birdwing, Chocolate Pansy, Plain Tiger, Danaid Eggfly, Common Crow, Lime Butterfly and Common Grass Yellow were commonly seen in and around the study area during the present study period. The following butterflies viz., Clipper, Malabar Banded Peacock, Red Helen, Peacock Pansy and Rustic were rarely seen in the study area.

2.1.4 ENDEMIC AND IUCN RED-LISTED BUTTERFLIES

Among the 49 species, some butterflies are coming under endemic and various IUCN red-listed categories. Two species namely, Crimson Rose and Danaid Eggfly are protected under schedule - I of Indian Wildlife Protection Act 1972. The Common Pierrot, Southern Birdwing and Common Gull are butterflies included in schedule- II. Species such as Malabar Banded Peacock, Blue Mormon, Crimson Rose and Southern Birdwing present in the area are endemic to Southern India (Kunte, 2000).

Table 14 List of butterflies recorded during the present study period

| No. | Family & Common name | Scientific name | Status * |
|---------------------|------------------------|---------------------------------|-----------------------|
| Papilionidae | | | |
| 1 | Blue Mormon | <i>Papilio polymnestor</i> | Endemic |
| 2 | Common Blue Bottle | <i>Graphium sarpedon</i> | |
| 3 | Common Mormon | <i>Papilio polytes</i> | |
| 4 | Common Rose | <i>Pachliopta aristolochiae</i> | |
| 5 | Crimson Rose | <i>Pachliopta hector</i> | Schedule-I |
| 6 | Lime Butterfly | <i>Papilio demoleus</i> | |
| 7 | Malabar Banded Peacock | <i>Papilio buddha</i> | Schedule-II & Endemic |
| 8 | Red Helen | <i>Papilio helenus</i> | |
| 9 | Southern Birdwing | <i>Troides minos</i> | Schedule-II & Endemic |
| 10 | Tailed Jay | <i>Graphium agamemnon</i> | |
| Pieridae | | | |
| 11 | Common Emigrant | <i>Catopsilia pomona</i> | |
| 12 | Common Jezebel | <i>Delias eucharis</i> | |
| 13 | Common Grass yellow | <i>Eurema hecabe</i> | |
| 14 | Common Gull | <i>Cepora nerissa</i> | Schedule-II |
| 15 | Common Wanderer | <i>Pareronia valeria</i> | |

| 48 | Dark Palm Dart | <i>Telicota ancilla</i> | |
| 49 | Rice Swift | <i>Borbo cinnara</i> | |

*Schedule of Indian Wildlife Protection Act 1972

2.2 FLORA

The area is surrounded by both aquatic and terrestrial ecosystems. Diverse systems such as marine, backwater, mangroves, cultivated lands, homesteads and urban sprawls are present in the study area that supported diverse floral species. A major portion of the study area being highly urbanised, the

methodology was suitably modified for documenting the urban diversity of flora as well.

2.2.1 METHODOLOGY

Vegetation is universally recognized as an integral component of ecosystems, which indicates the effects of changing environmental conditions in an obvious and easily measurable manner and is much important in site evaluation and classification. Vegetation sampling was undertaken in order to find out the plant community structure including species diversity and species richness. Careful analysis of vegetation is very important to know the distribution and types of floral components in an ecosystem. For phytosociological analysis quadrat method was used in the present study which is the most widely used technique for plant census.

During the initial stage of the study, an extensive field survey had been conducted for adopting suitable standard methods to document the biological elements in the study area. For documenting overall plant species occurring in the study area, a vegetation survey was made in areas within 10 km radial distance from the LNG site covering different habitats such as water bodies, human habitations, agricultural lands, homesteads etc.

Since the present study area is located in and around the dense human habitation, the detailed phytosociological study was mainly focussed only on natural vegetation patches, especially mangroves. Within urban areas there was no sizeable natural patch of vegetations available to lay even minimum size quadrats. To study the flora of the study area in general and to estimate the mangrove plant species community in particular, quadrats of 10 x 10 m size were laid in the various mangrove patches found within the 10 km radius. A total number of 20 such quadrats were laid during the present study. Species encountered during the vegetation sampling and surveys were

recorded. The identification of plants was done with the help of standard floras such as Hooker (1872-97), Gamble (1957), Matthew, (1983), Banerjee et al., (1989), Matthew (1999). The unidentified plants were collected and carefully preserved in 10% formaldehyde and brought to the Botanical Survey of India, Madras Herbarium (MH) Coimbatore for further identification by experts. The nomenclature given in the present study was based on the Flora of Tamil Nadu Series 1: Analysis vols. 1-3 (1983-1989).

The vegetation data collected from the different mangrove patches were analysed by using various softwares to obtain the quantitative structure and composition of mangrove plant communities. For understanding the characters of the mangrove vegetation, the species richness and diversity of species were calculated. The vegetation data were tabulated for frequency, density, abundance, relative frequency, relative density, relative abundance, IVI, Simpson Index and composition of plant communities, following Curtis and Mc Intosh (1950), Philips (1959), Ludwig and Reynolds (1988) and Lande (1996). The Shannon-Wiener's index of diversity (H') and Fisher's alpha diversity were also calculated using the software 'Species diversity and richness (version 2.65, Colwell, 1994-2004; see also Table 15).

Table 15 Calculation of quantitative structure and composition of mangrove areas

| Parameters | Formula adopted |
|--------------------|--|
| Frequency (%) | $(\text{No. of quadrats in which a species occurred} / \text{Total no. of quadrats studied}) \times 100$ |
| Abundance | Total number of individuals of the species/ No. of quadrats in which the species occurred |
| Density | Total no. of individuals of a given species/ Total no. of quadrats examined |
| Relative density | No. of individuals/ No. of individuals of all species |
| Relative abundance | $(\text{Abundance of species} \times 100) / \text{Sum of all abundances}$ |
| Relative frequency | Number of quadrats occurring/ Total no. of quadrats |
| IVI | Relative density + Relative dominance + Relative |

| | |
|---------------|--------------------|
| | frequency |
| Simpson Index | $D = \sum (n/N)^2$ |

2.2.2 FLORAL ANALYSIS

As far as the diversity of plants is concerned, the present study area was very rich. The study area was surrounded by dense human settlements of Kochi metropolitan City, mangrove forest patches, agricultural lands and various water bodies including rivers lakes and coastal wetlands. The present documentation was done in all the above said habitats/ecosystems. A total of 422 species under 290 genera belonging to 94 families were recorded during the present study period within the 10 km radius area from LNG site (Appendix i). Most of the plant species recorded in and around the human habitations in the study area.

2.2.3 HABIT-WISE ANALYSIS OF PLANTS

Since the present study area is coming under humid tropical climate, plant community was very rich and diverse. Among the total number of 422 species recorded here, trees are represented by maximum number of species (n=191; 40%) followed by herbaceous plants (n=115; 27%), shrubs (n=48; 12%), stragglers/climbers (n=38; 9%) and grasses with 30 species (7%) (Figure 5).

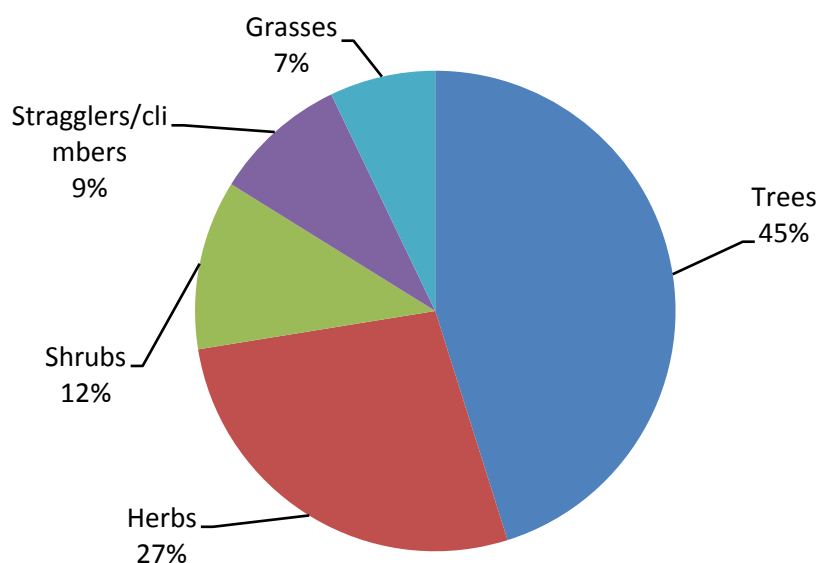

Figure 5 Habit-wise analysis of plants in the study area

2.2.4 FAMILIAL COMPOSITION

Among the 94 families of plants documented during the present study period from the study area, family Poaceae is represented by maximum number of plant species (n=30). The other notable plant families recorded in the study area are Euphorbiaceae with 28 species, Fabaceae 26 species, Caesalpiniaceae 19 species and Moraceae 18 species (Figure 6). The following plant families such as Aracauriaceae, Asparagaceae, Bixaceae, Cannaceae, Casuarinaceae, Costaceae, Dipterocarpaceae, Dioscoriaceae, Elaeocarpaceae, Goodiniaceae, Helicorniaceae, Hypoxidaceae, Lecythidaceae, Leaceae, Lemnaceae, Musaceae, Najadaceae, Pandanaceae, Phytolaccaceae, Proteaceae, Pteridaceae, Salviniaceae, Santalaceae, Strelitziaceae and Violaceae were represented by single species.

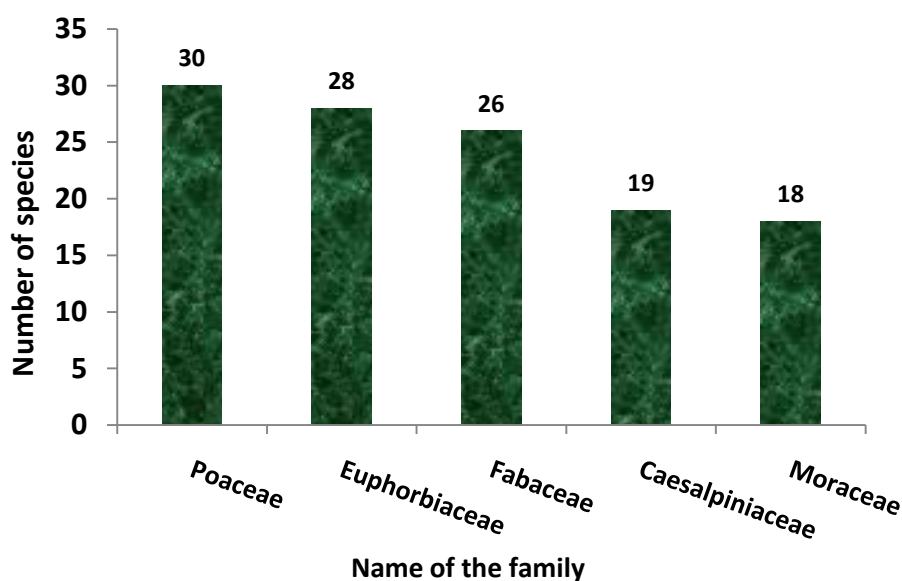

Figure 6 Dominant plant families in the study area

2.2.5 MAJOR VEGETATION IN AND AROUND THE STUDY AREA

The mangrove forests are the major forest type represented the study area. Mangrove vegetation is seen along with the backwater channels and the banks of estuarine waterbodies, in the form of small patches or continuous narrow stripes. The immediate surrounding of the LNG Terminal site is dominated by well established mangrove forests and various human habitations on one side and Arabian Sea on the another side. In the present study area, mangrove forests are present in Puthuvypeen, Kannamali, Narakkal, Kumbalangi, Kandalvanam, Mangalavanam, etc. Mangrove species such as *Acanthus illicifolius*, *Acrostichum aureum*, *Avicennia marina*, *A. officinalis*, *Bruguiera cylindrica*, *B. gymnorhiza*, *Derris trifoliata*, *Cissus trifoliata*, *Exoecaria agallocha*, *E. indica*, *Kandelia candel*, *Ceriops decandra*, *Rhizophora apiculata*, *R. mucronata*, *Sonneratia apetala*, *S. caeseolaris* etc. were encountered during the present study period. The species such as *Barringtonia racemosa*, *Calophyllum inophyllum*, *Cerbera odollum*, *Dolichandrone spathacea*, *Hibiscus tiliaceous*, *Morinda citrifolia*, *Premna serratifolia*, *Thespesia populnea*, *T. populneoides*, etc. were the important

mangrove associated species seen in the study area. Species such as *Avicennia officinalis*, *A. marina* and *Excoecaria agallocha* were abundant in the study area.

The other notable tree species recorded in the study area are *Ailanthus triphysa*, *Alstonia scholaris*, *Anthocephalus cadamba*, *Artocarpus hirsutus*, *A. incisus*, *Calophyllum inophyllum*, *Cerbera odollum*, *Chrysophyllum chinito*, *Garcinia gummi-gutta*, *Elaeocarpus serratus*, *Ficus nervosa*, *Gilircidia sepium*, *Hibiscus tiliaceous*, *Lanea coromandelica*, *Mimusops elengi*, *Madhuca longifolia*, *Morinda tinctoria*, *Samanea saman*, *Spathodea campanulata*, *Spondias pinnata*, *Syzygium cumini*, *S. malaccense*, *S. samarangense*, *Swietenia macrophylla*, *Tectona grandis*, *Thespesia populnea*, *Vateria indica* etc.

The shrubs such as *Abutilon indicum*, *A. hirtum*, *Bixa orellana*, *Breynia vitis-idaea*, *Caesalpinia bonduc*, *C. sappan*, *Clerodendrum inerme*, *C. indicum*, *C. infortunatum*, *C. viscosum*, *Cassia alata*, *C. auriculata*, *Helicteres isora*, *Holarrhena antidysenterica*, *Cressa cretica*, *Jatropha curcas*, *Ipomoea carnea*, *Hibiscus vitifolius*, *Nerium oleander*, *Phyllanthus reticulatus*, *Scaveola taccada*, *Sesbania procumbens*, *Thottea siliquosa*, etc.

The plants such as *Acrostichum aureum*, *Alternanthera sessilis*, *A. Bacoba monnerij*, *Crotalaria* spp. *Cyperus* spp. *Fimbristylis*, spp. *Cassia occidentalis*, *C. tora*, *Tephrosia purpurea*, *Cleome felina*, *Croton hirtum*, *Commelina longifolia*, *C. benghalensis*, *C. clavata*, *Eclipta alba*, *Hygrophila auriculata*, *Micrococca mercurialis*, *Mimosa pudica*, *Ottelia alismoides*, *Salvinia molesta*, *Scoparia dulcis*, *Sebastiania chaemelia*, *Sesuvium portulacastrum*, *Sida rhomboidea*, *Synedrella nodiflora*, etc. are the common herbaceous plants documented in the study area.

The species such as *Anamirta cocculus*, *Abrus precatorius*, *Aristolochia indica*, *Cardiospermum halicacabum*, *Carissa carandas*, *Cayratia pedata*, *Cissus trifoliata*, *Derris trifoliata*, *D. scandens*, *Ficus pumila*, *Ipomoea pescarpae*, *Passiflora edulis*, *Piper nigrum*, *P. longum*, *Pothos scandens*, *Raphidophora aurea*, *R. pertusa*, *Tiliacora acuminata*, *Tragia involucrata*, etc. are the most common climbers/stragglers recorded during the present study period.

The common grasses recorded in the study area include *Bothriochloa pertusa*, *Cenchrus ciliaris*, *Chloris barbata*, *Cymbopogon citratus*, *Cynodon dactylon*, *Cyrtococcum trigonum*, *Dactyloctenium aegyptium*, *Eleusine indica*, *Imperata cylindrica*, *Rottboellia exaltata*, *Setaria palmifolia*, *Zoysia materella* etc.

2.2.6 PLANTS RECORDED IN AND AROUND HUMAN SETTLEMENTS

Plants species recorded in and around the human habitation in the study area were broadly classified in to following two major types based on their usefulness.

2.2.7 FOOD/FRUIT YIELDING PLANTS

The common food/fruit yielding plant species observed in and around the human habitation include *Achras sapota*, *Garcinia gummi-gutta*, *Artocarpus heterophyllus*, *A. hirsutus*, *A. incisus*, *Annona squamosa*, *A. reticulata*, *Eugenia uniflora*, *Citrus limon*, *C. grandis*, *Passiflora edulis*, *Tamarindus indicus*, *Cocos nucifera*, *Myristica fragrans*, *Muntingia calabura*, *Elaeocarpus serratus*, *Avehhora bilimbii*, *A. carambola*, *Anacardium occidentale*, *Phyllanthus acida*, *P. emblica*, *Carissa carandas*, *Mangifera indica*, *Syzygium cumini*, *S. jambos*, *S. malaccense*, *S. samarngense*, *Spondias pinnata*, *Theobroma cocoa*, etc.

The food/fruit yielding plants recorded in the study area were found in almost all the sampling areas (namely North 1 (N1), North 2 (N2), North-East

1 (NE1), North-East 2 (NE2), South 1 (S1), South 2 (S2), South-east 1 (SE1) and South-East 2 (SE2)). The common food/fruit yielding plant species observed in and around the human habitation are given in the table.

2.2.8 ORNAMENTAL PLANTS

The common ornamental plants documented during the present study period in the human settlements include *Allamanda cathartica*, *Araucaria columnaris*, *Areca lutescens*, *Bauhinia acuminata*, *B. purpurea*, *B. tomentosa*, *Bixa orellana*, *Butea monosperma*, *Callistemon lanceolatus*, *Canna indica*, *Clerodendrum indicum*, *C. infortunatum*, *Cyrtostachys renda*, *Vateria indica*, *Diospyros microphyllus*, *Duranta repens*, *Ficus pumila*, *Haemalia patens*, *Gliricidia sepium*, *Ailanthus triphysa*, *Sterculia foetida*, *Pisonia alba*, *Heliconia rostrata*, *Hibiscus rosa-sinensis*, *Ixora coccinea*, *Ravenala madagascariensis*, *Raphidophora aurea*, *R. pertusa*, *Saraca asoka*, *Cassia fistula*, *Manilkara hexandra*, etc (Appendix iii).

2.2.9 ENDEMIC PLANTS RECORDED IN THE STUDY AREA

Six plant species namely *Artocarpus hirsutus*, *Hardwickia binata*, *Lagerstroemia microcarpa*, *Phyllanthus rotundifolius*, *Terminalia paniculata* and *Vateria indica* are endemic species encountered during the present study period. Though these species are commonly seen in the study area and surroundings, their distribution is restricted only to Southern India and these are coming under rare and endemic category.

Table 16 List of important groups of plants recorded from the study area

| Plant Name | Sampling Points |
|-----------------------------------|----------------------------|
| Food/fruit yielding plants | |
| <i>Achras sapota</i> | All the sampling locations |
| <i>Garcinia gummi-gutta</i> | All the sampling locations |
| <i>Artocarpus heterophyllus</i> | All the sampling locations |
| <i>A. hirsutus</i> | All the sampling locations |
| <i>A. incisus</i> | All the sampling locations |

| | |
|-------------------------------|----------------------------|
| <i>Annona squamosa</i> | All the sampling locations |
| <i>A. reticulata</i> | All the sampling locations |
| <i>Eugenia uniflora</i> | N1, N2 and SE2 |
| <i>Citrus limon</i> | All the sampling locations |
| <i>C. grandis</i> | All the sampling locations |
| <i>Passiflora edulis</i> | All the sampling locations |
| <i>Tamarindus indicus</i> | N1, NE1, NE2 and S1 |
| <i>Cocos nucifera</i> | All the sampling locations |
| <i>Myristica fragrans</i> | All the sampling locations |
| <i>Muntingia calabura</i> | All the sampling locations |
| <i>Elaeocarpus serratus</i> | N1 and N2 |
| <i>Avehhora bilimbi</i> | All the sampling locations |
| <i>A. carambola</i> | All the sampling locations |
| <i>Anacardium occidentale</i> | All the sampling locations |
| <i>Phyllanthus acida</i> | All the sampling locations |
| <i>P. emblica</i> | All the sampling locations |
| <i>Carissa carandas</i> | All the sampling locations |
| <i>Mangifera indica</i> | All the sampling locations |
| <i>Syzygium cumini</i> | All the sampling locations |
| <i>S. jambos</i> | All the sampling locations |
| <i>S. malaccense</i> | All the sampling locations |
| <i>S. samarngense</i> | All the sampling locations |
| <i>Spondias pinnata</i> | All the sampling locations |
| <i>Theobroma cocoa</i> | NE1 and NE2 |

Ornamental plants

| | |
|--------------------------------|---------------------------------------|
| <i>Allamanda cathartica</i> | All the sampling locations |
| <i>Araucaria columnaris</i> | All the sampling locations except NE2 |
| <i>Areca lutescens</i> | All the sampling locations |
| <i>Bauhinia acuminata</i> | All the sampling locations |
| <i>B. purpurea</i> | All the sampling locations |
| <i>B. tomentosa</i> | All the sampling locations |
| <i>Bixa orellana</i> | N1, N2, S1, S2 and SE1 |
| <i>Butea monosperma</i> | N1, N2 and SE1 |
| <i>Callistemon lanceolatus</i> | All the sampling locations |
| <i>Canna indica</i> | All the sampling locations |

2.2.10 IMPORTANT MEDICINAL PLANTS

The present study area has rich and diverse medicinal plant community. Some important medicinal plants recorded during the present study include *Abrus precatorius*, *Adhatoda vasica*, *Aegle marmelos*, *Anamirta cocculus*, *Anthocephalus cadamba*, *Azadirachta indica*, *Bacoba monnieri*, *Cadaba indica*, *Caesalpinia sappan*, *Cardiospermum halicacabum*, *Costos speciosus*, *Couroupita guianensis*, *Ionidium suffruticosum*, *Santalum album*, *Pterocarpus marsupium*, *Aristolochia indica*, *A. tagala*, *Curculigo orchoides*, *Vateria indica*, etc. The list of medicinal plants recorded in the study area during the present study period was given in the Appendix ii

2.2.11 PHYTOSOCIOLOGY

Since there was a little information available on the mangrove patches of the area, an extensive survey was carried out as part of the present study. Phytosociological studies were carried out during the present study period in different mangrove patches of the study area. A total number of 1942 individuals, belonging to 23 mangrove species, coming under 15 genera and spread over 11 families, in 20 quadrats (10 x 10 m), were recorded during the present study period from the different mangrove patches. The mangrove vegetation community parameters were calculated from the data and presented in the Table 18

Among the 23 species, the shrub, *Acanthus ilicifolius* was represented by maximum number of individuals (n=310) followed by *Bruguiera gymnorhiza* (n=195), *Excoercia agallocha* (n=187), *Sonneratia caeseolaris* (n=121) and

Rhizophora apiculata and *Rhizophora mucronata* with 115 species each. Likewise, the species such as *Cerbera odollum* (n=8) *Calophyllum inophyllum* (n=5) were represented by least number of individuals, recorded during the present study period.

The maximum density value recorded for *Acanthus ilicifolius* (19.00) followed by *Bruguiera gymnorhiza* (9.75), *Exocaeria agallocha* (9.35), *Sonneratia caeseolaris* (6.05) and *Rhizophora apiculata* & *Rhizophora mucronata* (5.75) each. The highest Relative density value recorded for *Acanthus ilicifolius* (19.57) followed by *Bruguiera gymnorhiza* (10.04), *Exocaeria agallocha* (9.63), *Sonneratia caeseolaris* (6.23) and *Rhizophora apiculata* and *Rhizophora mucronata* (5.92) each.

The maximum abundance value recorded for *Acanthus ilicifolius* (23.75) followed by *Bruguiera gymnorhiza* (12.19), *Exocaeria agallocha* (9.35), *Sonneratia caeseolaris* (8.07) and *Rhizophora mucronata* (7.67) each. The highest relative abundance value recorded for *Acanthus ilicifolius* (17.44) followed by *Bruguiera gymnorhiza* (8.95), *Exocaeria agallocha* (8.08), *Sonneratia caeseolaris* (5.92) and *Rhizophora mucronata* (5.63) each.

The highest Important Value Index (IVI) was recorded for *Acanthus ilicifolius* (42.77) followed by *Bruguiera gymnorhiza* (24.75), *Exocaeria agallocha* (11.00), *Sonneratia caeseolaris* (17.55) and *Rhizophora apiculata* (17.01).

The Shannon-Weiner index of diversity for mangrove vegetation community in the study area is 2.7269. The Simpson index of diversity is 0.91. The Fishers Alpha diversity is 3.6683.

2.3 SENSITIVE AREAS

The proposed site for the LNG terminal is in close proximity to the cityscape of Kochi and there is only one natural protected area available within 10 km radial distance around the facility namely the Mangalavanam Bird Sanctuary. Vembanad kole wetland is the nearest Ramsar site (wetland of International Importance) located at a distance of about 40 km.

2.3.1 MANGALAVANAM BIRD SANCTUARY

The Mangalavanam Bird Sanctuary is the prominent natural haven for birds and other wildlife situated in the Kochi City at around five kilometres from the LNG site in the vicinity of the project area. There has been concerns in the past regarding the urbanization pressure leading to declining bird population of the area. However the Mangalavanam bird sanctuary is at considerable distance away from the LNG project site and is unlikely to have any direct impact on the sanctuary.

Figure 7. Map showing the mangrove degradation and location of blockages

2.3.2 THE MANGROVES

Mangroves are important coastal ecosystems that play crucial roles in the local ecology and also in livelihood security of human populations around. The mangroves being a specialized system adapted to the unique conditions that exist along the interphase of land and water are sensitive systems that with high conservation priority. The most important natural ecosystem of the present study area is the already degraded mangrove area adjacent to the LNG project site on its east covering about 1 km² area.

During the present study, it was noticed that the mangrove area adjacent to the Puthuvypeen LNG facility has undergone serious degradation starting from 2007 as inferred from an analysis of historical satellite pictures of the area. The single contiguous patch of mangroves that existed prior to the year 2007 got fragmented by new roads and bunds that came up later (Figure 7). There are three major areas within this patch where mangroves has been severely affected and resulted in the death of mangrove trees as marked on

the map (marked with numbers **01**, **02** and **03** in Figure 7). There are four major causes that has apparently caused this mangrove degradation;

- 1) The Road that traverse the mangrove patch,
- 2) the bund along the eastern water front edge of the mangroves,
- 3) The clear felling of mangroves (marked as 02 in the figure) and
- 4) The dredge spoils dump in the mangrove area (marked as D1 in the Figure 7).

Among these the first three reasons are unrelated with the activities of LNG terminal development. However due to the dumping of dredge spoils on mangrove areas (at around $9^{\circ}58'28.02''N$ & $76^{\circ}13'56.39''E$) during the LNG port development works has contributed to the blockage and siltation in the mangrove area around $9^{\circ}58'36.90''N$ & $76^{\circ}14'1.72''E$ and it need to be removed and water channel be restored urgently to stop the rapid degradation of the mangrove forests of the area.

Figure 8 Mangrove patches near the project site

3 Impacts from the Augmentation project

The proposed capacity augmentation of the LNG terminal facility from 2.5 MMTPA to 5 MMTPA as proposed by M/s PLL does not involve additional tank construction or any land requirement. Only additionality involved are two additional pumps within the existing tanks and an additional regasification facility and associated pipelines within the existing area for which the space had already been provisioned in the earlier site plan for which due environmental clearance is already in place.

Since the augmentation as proposed does not involve any significant perceivable additional source of impact the additionality of impacts as far as flora and fauna around the site is concerned would be negligible. However, proper environmental management towards conservation of mangroves of the area is required for the long-term survival of these mangroves. Since the mangrove areas and the causes of degradation such as blockages of drainage due to roads and stone quarry debris dumping etc. are not the result of direct actions of M/s PLL; concerned authorities such as Cochin Port Trust should be urged to take the initiatives to remove the blockages (see Figure 7) and restore the drainage channels connecting the mangrove patches and the creek/ sea waters. The dredge spoils dumped on the mangrove area (marked as **D2** in the Figure 7) need to be removed to restore the health of the mangrove system of this area.

4 Management plan

The augmentation proposal as proposed by M/s PLL does not involve new land acquisition nor does it involve any significant additional emissions or water consumption. Moreover, the hot ambient air is proposed to be used for LNG vapourization instead of seawater, thus avoiding the seawater

requirement as envisaged in earlier EIA. This has further reduced any likely impact to marine life from thermal pollution. Hence the management plan as suggested in the earlier EIA report for the initial 2.5 MMTPA LNG facility (Giridhar *et al.* 1999) may be strictly followed. Certain additional safeguards and environmental management measures especially for the conservation of degraded mangroves forests near the LNG facility, which is a recent development and hence does not find mention in the earlier EIA report of 1999 (Giridhar *et al.* 1999) need to be followed as discussed below.

4.1 MANGROVE CONSERVATION

As already discussed elsewhere in this report, the the present augmentation proposal of LNG facility is unlikely to cause any mangrove destruction. However, as observed in certain areas of the present study area the dredge spoils dumped on the mangroves has contributed to the blockage of drainage and siltation in the surrounding mangrove areas and it need to be removed and water channel needs to be restored urgently to stop the degradation of the mangrove area. Efforts should also be made consultation with Cochin Port Trust authorities to regenerate the lost mangrove patch on the western side of the LNG facility through planting local mangrove plant species such as *Acanthus illicifolius*, *Avicennia marina*, *A. officinalis*, *Bruguiera cylindrica*, *B. gymnorhiza*, *Exoecaria agallocha*, *E. indica*, *Kandelia candel*, *Ceriops decandra*, *Rhizophora apiculata*, *R. mucronata*, *Sonneratia apetala* and *S. Caeseolaris*.

Development of a Green belt around the facility with suitable tree species as described below may also be taken up.

4.2 DEVELOPMENT OF GREEN BELT

There is only minimum construction activity will be involved in the present augmentation project with no forest land to be required to be diverted while

executing this project. Hence, the compensatory afforestation programme is not mandatory. However, as a commitment for nature conservation and environmental protection, the Petronet LNG Ltd. may arrange some plantation programmes, especially in their own designated Green belt development area and also its surrounding areas as far as possible with co-operation from Cochin Port Trust.

4.2.1 SUGGESTED PLANTS FOR GREENBELT

The selection of plant species for the green belt development depends on various factors such as climate, elevation and soil. The plants suggested here for green belt were selected keeping in mind the following desirable characteristics.

- Fast growing and providing optimum penetrability.
- Evergreen with minimal litter fall.
- Wind-firm and deep rooted.
- Forms a dense canopy.
- As far as possible, the species should be indigenous and locally available.
- Trees with high foliage density, large size of leaves and hairy on both the surfaces.
- Ability to withstand conditions like inundation and drought.
- Soil improving plants, such as nitrogen fixing plants, rapidly decomposable leaf litter.
- Attractive appearance with good flowering and fruit bearing.
- Bird and insect attracting tree species.
- Sustainable green cover with minimal maintenance
- Species which can trap/sequester more carbon

Some of the species that can be considered for planting are given in the following table. A total of 46 plant species recommended for planting in and around the project site (Table 19).

Table 19 List of plants suggested for greenbelt development around the LNG site.

| Sl. No. | Binomial name | Family |
|---------|---------------------------------|----------------|
| 1. | <i>Rhizophora apiculata</i> | Rhizophoraceae |
| 2. | <i>Rhizophora mucronata</i> | Rhizophoraceae |
| 3. | <i>Anthocephalus cadamba</i> | Rubiaceae |
| 4. | <i>Bruguiera cylindrica</i> | Rhizophoraceae |
| 5. | <i>Bruguiera gymnorrhiza</i> | Rhizophoraceae |
| 6. | <i>Avicennia alba</i> | Avicenniaceae |
| 7. | <i>Avicennia marina</i> | Avicenniaceae |
| 8. | <i>Avicennia officinalis</i> | Avicenniaceae |
| 9. | <i>Barringtonia acutangula</i> | Lecythidaceae |
| 10. | <i>Barringtonia asiatica</i> | Lecythidaceae |
| 11. | <i>Barringtonia racemosa</i> | Lecythidaceae |
| 12. | <i>Ailanthus triphysa</i> | Simaroubaceae |

| 24. | <i>Mallotus philippensis</i> | Euphorbiaceae |
| 25. | <i>Mangifera indica</i> | Anacardiaceae |
| 26. | <i>Manilkara hexandra</i> | Sapotaceae |
| 27. | <i>Mimusops elengi</i> | Sapotaceae |
| 28. | <i>Morinda citrifolia</i> | Rubiaceae |
| 29. | <i>Myristica fragrans</i> | Myristicaceae |
| 30. | <i>Plumeria acuminata</i> | Apocynaceae |
| 31. | <i>Plumeria alba</i> | Apocynaceae |
| 32. | <i>Plumeria rubra</i> | Apocynaceae |
| 33. | <i>Simarouba glauca</i> | Simaroubaceae |
| 34. | <i>Syzygium cumini</i> | Myrtaceae |
| 35. | <i>Syzygium jambos</i> | Myrtaceae |
| 36. | <i>Syzygium malaccense</i> | Myrtaceae |
| 37. | <i>Syzygium samarangense</i> | Myrtaceae |
| 38. | <i>Terminalia bellirica</i> | Combretaceae |
| 39. | <i>Terminalia catappa</i> | Combretaceae |

| Sl. No. | Binomial name | Family |
|---------|-------------------------------|------------------|
| 40. | <i>Terminalia crenulata</i> | Combretaceae |
| 41. | <i>Terminalia paniculata</i> | Combretaceae |
| 42. | <i>Thespesia populnea</i> | Malvaceae |
| 43. | <i>Thespesia populneoides</i> | Malvaceae |
| 44. | <i>Vateria indica</i> | Dipterocarpaceae |
| 45. | <i>Xylia xylocarpa</i> | Mimosaceae |
| 46. | <i>Zanthoxylum rhetsa</i> | Rutaceae |

The species suggested here are commonly seen in and around the project area, fast growing and drought resistant. Seedlings / saplings of these species can be easily procured from local nurseries.

5 Conclusion

The present study documented the major elements of the flora and fauna of the area mainly through direct field data collection following standard methods supported by secondary data sources wherever necessary. The restricted study period of three months was the major limitation to check the faunal diversity of the area comprehensively. However in addition to our own field observations, the possible faunal species of the area from various secondary sources are also incorporated in this report.

Most of the areas at 10km radial distance from the LNG facility are covered by sea and backwaters. The present study was focussed on the terrestrial biodiversity aspects and most of the land area coming within the 10km radial distance was urban areas with very little scope for natural vegetation. Despite these restricted habitat availability and urbanization pressure, the study area showed reasonably good diversity and abundance of floral and faunal species.

The study area showed good diversity (Shannon-Weiner index: 2.727) and abundance in terms of floral species. The diversity for mangrove vegetation

in the study area was also high with Simpson index of diversity 0.91 (Fishers Alpha diversity = 3.6683).

A major cause of concern in the area is the degradation of the Mangrove patch adjacent to the PLL's LNG facility caused by various reasons as discussed earlier in relevant sections of this report. The M/s PLL may take active steps to manage this issue as suggested under the management plan section of this report.

Considering the urbanised environment of the study area, the diversity of faunal and floral elements recorded during the present study was relatively good. However being a predominately urban area the species recored were mostly common ones and none was restricted to this area or its immediate environs. As discussed elsewhere in this report, specific impact from the proposed Augmentation project activities would be minimal on the flora and fauna provided the management plans as per the present report and the EIA report of 1999 are followed meticulously.

6 Plates

Grey pansy butterfly

Crimson rose butterfly

Mangrove- Rhizophora

Common Mormon Butterfly

Rhizophora mucronata

Indian Flying fox

Eichornnia, Salvinia & Pistia

Eichornnia in Flower

Chasalia curviflora

Mangrove fern- *Acrostichum* sp.

Drying mangroves

Common Palmfly

Plate 1 Glimpses of the Biodiversity from the study areas

Flame backed Woodpecker

Common Sand piper

Red wattled lapwing

Darter

Brahminy Kite

Greater Racket-tailed Drongo

Plain Prinia

Purple Heron

Plate 2 Some of the bird species recorded from the study area

View of Mangroves (at SE1)

Open landscape near lighthouse (at N1)

Mangrove tourism facility (at N2)

Landscape at NE1

Beach at N1

Agricultural/ aquaculture area (at NE2)

Plate 3 Snapshots of salient features of study area landscape

New road and pipelines (at NE1)

Dredge spoils dumped on mangroves (at SE1)

View of Mangalavanam bird sanctuary (at SE2)

Remnants of Mangrove trees (at NE1)

Chinese Fishing nets (at S2)

Fishing boats (at SE1)

Plate 4 Snapshots of salient features of the study area landscape- 2

7 Appendices

Appendix i List of plants recorded during the present study

| Sl. No. | Name of the Plant | Family | Habit |
|---------|-------------------------------------|----------------|-----------|
| 1. | <i>Abrus precatorius</i> | Fabaceae | Straggler |
| 2. | <i>Abutilon hirtum</i> | Malvaceae | Shrub |
| 3. | <i>Abutilon indicum</i> | Malvaceae | Shrub |
| 4. | <i>Acacia auriculiformis</i> | Mimosaceae | Tree |
| 5. | <i>Acacia mangium</i> | Mimosaceae | Tree |
| 6. | <i>Acalypha brachystachya</i> | Euphorbiaceae | Herb |
| 7. | <i>Acalypha indica</i> | Euphorbiaceae | Herb |
| 8. | <i>Acalypha malabarica</i> | Euphorbiaceae | Herb |
| 9. | <i>Acalypha paniculata</i> | Euphorbiaceae | Herb |
| 10. | <i>Acanthus ilicifolius</i> | Acanthaceae | Shrub |
| 11. | <i>Achras sapota</i> | Sapotaceae | Tree |
| 12. | <i>Acrostichum aureum</i> | Pteridaceae | Herb |
| 13. | <i>Adenanthera pavoniana</i> | Mimosaceae | Tree |
| 14. | <i>Adhatoda vasica</i> | Acanthaceae | Shrub |
| 15. | <i>Adina cordifolia</i> | Rubiaceae | Tree |
| 16. | <i>Aegle marmelos</i> | Rutaceae | Tree |
| 17. | <i>Ailanthus excelsa</i> | Simaroubaceae | Tree |
| 18. | <i>Ailanthus triphysa</i> | Simaroubaceae | Tree |
| 19. | <i>Albizia lebbek</i> | Mimosaceae | Tree |
| 20. | <i>Allamanda cathartica</i> | Apocynaceae | Straggler |
| 21. | <i>Alstonia scholaris</i> | Apocynaceae | Tree |
| 22. | <i>Alternanthera paronychioides</i> | Amaranthaceae | Herb |
| 23. | <i>Alternanthera sessilis</i> | Amaranthaceae | Herb |
| 24. | <i>Alternanthera tenella</i> | Amaranthaceae | Herb |
| 25. | <i>Alysicarpus rugosus</i> | Fabaceae | Herb |
| 26. | <i>Amaranthus spinosus</i> | Amaranthaceae | Herb |
| 27. | <i>Amaranthus viridis</i> | Amaranthaceae | Herb |
| 28. | <i>Anacardium occidentale</i> | Anacardiaceae | Tree |
| 29. | <i>Anamirta cocculus</i> | Menispermaceae | Climber |
| 30. | <i>Aneliema</i> sp. | Commelinaceae | Herb |
| 31. | <i>Annona muricata</i> | Annonaceae | Tree |
| 32. | <i>Annona reticulata</i> | Annonaceae | Tree |
| 33. | <i>Annona squamosa</i> | Annonaceae | Tree |
| 34. | <i>Anthocephalus cadamba</i> | Rubiaceae | Tree |
| 35. | <i>Antigonon leptopus</i> | Polygonaceae | Climber |
| 36. | <i>Araucaria columnaris</i> | Araucariaceae | Tree |
| 37. | <i>Areca catechu</i> | Arecaceae | Tree |

| Sl. No. | Name of the Plant | Family | Habit |
|---------|----------------------------------|------------------|-----------|
| 38. | <i>Areca lutescens</i> | Arecaceae | Tree |
| 39. | <i>Aristolochia indica</i> | Aristolochiaceae | Climber |
| 40. | <i>Aristolochia tagala</i> | Aristolochiaceae | Climber |
| 41. | <i>Artocarpus hirsutus</i> | Moraceae | Tree |
| 42. | <i>Artocarpus incisus</i> | Moraceae | Tree |
| 43. | <i>Artocarpus integrifolius</i> | Moraceae | Tree |
| 44. | <i>Asparagus racemosus</i> | Asparagaceae | Straggler |
| 45. | <i>Asystasia dalzelii</i> | Acanthaceae | Herb |
| 46. | <i>Asystasia gangetica</i> | Acanthaceae | Herb |
| 47. | <i>Averrhoa bilimbi</i> | Averrhoaceae | Tree |
| 48. | <i>Averrhoa carambola</i> | Averrhoaceae | Tree |
| 49. | <i>Avicennia alba</i> | Avicenniaceae | Tree |
| 50. | <i>Avicennia marina</i> | Avicenniaceae | Tree |
| 51. | <i>Avicennia officinalis</i> | Avicenniaceae | Tree |
| 52. | <i>Azadirachta indica</i> | Meliaceae | Tree |
| 53. | <i>Bacopa monnieri</i> | Scrophulariaceae | Herb |
| 54. | <i>Bambusa arundinacea</i> | Poaceae | Grass |
| 55. | <i>Bambusa vulgaris</i> | Poaceae | Grass |
| 56. | <i>Barringtonia acutangula</i> | Lecythidaceae | Tree |
| 57. | <i>Barringtonia asiatica</i> | Lecythidaceae | Tree |
| 58. | <i>Barringtonia racemosa</i> | Lecythidaceae | Tree |
| 59. | <i>Bauhinia acuminata</i> | Caesalpiniaceae | Tree |
| 60. | <i>Bauhinia purpurea</i> | Caesalpiniaceae | Tree |
| 61. | <i>Bauhinia racemosa</i> | Caesalpiniaceae | Tree |
| 62. | <i>Bauhinia tomentosa</i> | Caesalpiniaceae | Shrub |
| 63. | <i>Bixa orellana</i> | Bixaceae | Shrub |
| 64. | <i>Blumea lacera</i> | Asteraceae | Herb |
| 65. | <i>Boerhavia diffusa</i> | Nyctaginaceae | Herb |
| 66. | <i>Bombax malabaricum</i> | Bombacaceae | Tree |
| 67. | <i>Borassus flabellifer</i> | Arecaceae | Tree |
| 68. | <i>Borreria hispida</i> | Rubiaceae | Herb |
| 69. | <i>Borreria ocymoides</i> | Rubiaceae | Herb |
| 70. | <i>Bothriochloa pertusa</i> | Poaceae | Grass |
| 71. | <i>Bougainvillea spectabilis</i> | Nyctaginaceae | Straggler |
| 72. | <i>Brachiaria sp.</i> | Poaceae | Grass |
| 73. | <i>Breynia vitis-idaea</i> | Euphorbiaceae | Shrub |
| 74. | <i>Bridelia crenulata</i> | Euphorbiaceae | Tree |
| 75. | <i>Bruguiera cylindrica</i> | Rhizophoraceae | Tree |
| 76. | <i>Bruguiera gymnorrhiza</i> | Rhizophoraceae | Tree |
| 77. | <i>Bruguiera sexangula</i> | Rhizophoraceae | Tree |
| 78. | <i>Butea monosperma</i> | Fabaceae | Tree |

| Sl. No. | Name of the Plant | Family | Habit |
|---------|---|-----------------|-----------|
| 79. | <i>Cadaba indica</i> | Capparidaceae | Straggler |
| 80. | <i>Caesalpinia bonduc</i> | Caesalpiniaceae | Shrub |
| 81. | <i>Caesalpinia sappan</i> | Caesalpiniaceae | Shrub |
| 82. | <i>Caesalpinia coriaria</i> | Caesalpiniaceae | Tree |
| 83. | <i>Callistemon lanceolatus</i> | Myrtaceae | Tree |
| 84. | <i>Calophyllum inophyllum</i> | Clusiaceae | Tree |
| 85. | <i>Canavalia cathartica</i> | Fabaceae | Straggler |
| 86. | <i>Canna indica</i> | Cannaceae | Herb |
| 87. | <i>Cardiospermum halicacabum</i> | Sapindaceae | Climber |
| 88. | <i>Carissa carandas</i> | Apocynaceae | Straggler |
| 89. | <i>Caryota urens</i> | Arecaceae | Tree |
| 90. | <i>Cassia alata</i> | Caesalpiniaceae | Shrub |
| 91. | <i>Cassia auriculata</i> | Caesalpiniaceae | Shrub |
| 92. | <i>Cassia fistula</i> | Fabaceae | Tree |
| 93. | <i>Cassia javanica</i> | Caesalpiniaceae | Tree |
| 94. | <i>Cassia nodosa</i> | Caesalpiniaceae | Tree |
| 95. | <i>Cassia obtusa</i> | Caesalpiniaceae | Shrub |
| 96. | <i>Cassia occidentalis</i> | Caesalpiniaceae | Herb |
| 97. | <i>Cassia siamea</i> | Caesalpiniaceae | Tree |
| 98. | <i>Cassia tora</i> | Caesalpiniaceae | Herb |
| 99. | <i>Cassytha filiformis</i> | Lauraceae | Climber |
| 100. | <i>Casuarina equisetifolia</i> | Casuarinaceae | Tree |
| 101. | <i>Cayratia pedata</i> | Vitaceae | Climber |
| 102. | <i>Ceiba pentandra</i> | Bombacaceae | Tree |
| 103. | <i>Cenchrus ciliaris</i> | Poaceae | Grass |
| 104. | <i>Cerbera odollum</i> | Apocynaceae | Tree |
| 105. | <i>Ceriops decandra</i> | Rhizophoraceae | Shrub |
| 106. | <i>Ceriops tagal</i> | Rhizophoraceae | Shrub |
| 107. | <i>Chasalia curviflora</i> var. <i>ophioxyloides</i> | Rubiaceae | Herb |
| 108. | <i>Chloris barbata</i> | Poaceae | Grass |
| 109. | <i>Chromolaena odorata</i> | Asteraceae | Shrub |
| 110. | <i>Chrysophyllum cainito</i> | Sapotaceae | Tree |
| 111. | <i>Cinnamomum zeylanicum</i> | Lauraceae | Tree |
| 112. | <i>Cissus trifoliata</i> | Vitaceae | Climber |
| 113. | <i>Citharexylum subserratum</i> | Verbenaceae | Tree |
| 114. | <i>Citrus grandis</i> | Rutaceae | Tree |
| 115. | <i>Citrus limon</i> | Rutaceae | Tree |
| 116. | <i>Cleistanthus collinus</i> | Euphorbiaceae | Tree |
| 117. | <i>Cleome felina</i> | Capparidaceae | Herb |
| 118. | <i>Clerodendrum indicum</i> | Verbenaceae | Shrub |

| Sl. No. | Name of the Plant | Family | Habit |
|----------------|----------------------------------|----------------|--------------|
| 119. | <i>Clerodendrum inerme</i> | Verbenaceae | Shrub |
| 120. | <i>Clerodendrum infortunatum</i> | Verbenaceae | Shrub |
| 121. | <i>Clerodendrum serratum</i> | Verbenaceae | Shrub |
| 122. | <i>Clerodendrum viscosum</i> | Verbenaceae | Shrub |
| 123. | <i>Coccinia grandis</i> | Cucurbitaceae | Climber |
| 124. | <i>Cocus nucifera</i> | Arecaceae | Tree |
| 125. | <i>Coffea arabica</i> | Rubiaceae | Shrub |
| 126. | <i>Coix lacryma-jobi</i> | Poaceae | Grass |
| 127. | <i>Colocasia esculenta</i> | Araceae | Herb |
| 128. | <i>Commelina benghalensis</i> | Commelinaceae | Herb |
| 129. | <i>Commelina clavata</i> | Commelinaceae | Herb |
| 130. | <i>Commelina longifolia</i> | Commelinaceae | Herb |
| 131. | <i>Conyza leucantha</i> | Asteraceae | Herb |
| 132. | <i>Corchorus aestuans</i> | Tiliaceae | Herb |
| 133. | <i>Cordia obliqua</i> | Boraginaceae | Tree |
| 134. | <i>Cordia sebastiana</i> | Boraginaceae | Tree |
| 135. | <i>Costos speciosus</i> | Costaceae | Herb |
| 136. | <i>Couroupita guianensis</i> | Lecythidaceae | Tree |
| 137. | <i>Cressa cretica</i> | Convolvulaceae | Shrub |
| 138. | <i>Crotalaria juncea</i> | Fabaceae | Shrub |
| 139. | <i>Crotalaria mysorensis</i> | Fabaceae | Herb |
| 140. | <i>Crotalaria pallida</i> | Fabaceae | Herb |
| 141. | <i>Crotalaria retusa</i> | Fabaceae | Herb |
| 142. | <i>Crotalaria verrucosa</i> | Fabaceae | Shrub |
| 143. | <i>Croton hirtum</i> | Euphorbiaceae | Herb |
| 144. | <i>Curculigo orchioides</i> | Hypoxidaceae | Herb |
| 145. | <i>Cuscuta reflexa</i> | Convolvulaceae | Climber |
| 146. | <i>Cymbopogon citratus</i> | Poaceae | Grass |
| 147. | <i>Cynodon dactylon</i> | Poaceae | Grass |
| 148. | <i>Cynotis cristata</i> | Commelinaceae | Herb |
| 149. | <i>Cyperus difformis</i> | Cyperaceae | Herb |
| 150. | <i>Cyperus exaltatus</i> | Cyperaceae | Herb |
| 151. | <i>Cyperus iria</i> | Cyperaceae | Herb |
| 152. | <i>Cyperus pangorei</i> | Cyperaceae | Herb |
| 153. | <i>Cyperus rotundus</i> | Cyperaceae | Herb |
| 154. | <i>Cyrtococcum trigonum</i> | Poaceae | Grass |
| 155. | <i>Cyrtostachys renda</i> | Arecaceae | Tree |
| 156. | <i>Dactyloctenium aegyptium</i> | Poaceae | Grass |
| 157. | <i>Dalbergia latifolia</i> | Fabaceae | Tree |
| 158. | <i>Dalbergia sissoo</i> | Fabaceae | Tree |
| 159. | <i>Dalbergia spinosa</i> | Fabaceae | Shrub |

| Sl. No. | Name of the Plant | Family | Habit |
|---------|---|-----------------|-----------|
| 160. | <i>Delonix regia</i> | Caesalpiniaceae | Tree |
| 161. | <i>Derris scandens</i> | Fabaceae | Straggler |
| 162. | <i>Derris trifoliata</i> | Fabaceae | Straggler |
| 163. | <i>Desmodium triflorum</i> | Fabaceae | Herb |
| 164. | <i>Digitalis purpurea</i> | Plantaginaceae | Herb |
| 165. | <i>Digitaria bicornis</i> | Poaceae | Grass |
| 166. | <i>Dioscorea batatus</i> | Dioscoriaceae | Climber |
| 167. | <i>Diospyros microphyllus</i> | Ebenaceae | Tree |
| 168. | <i>Diospyros peregrina</i> | Ebenaceae | Tree |
| 169. | <i>Dolichandrone spathacea</i> | Bignoniaceae | Tree |
| 170. | <i>Drypetes roxburghii</i> | Euphorbiaceae | Tree |
| 171. | <i>Duranta repens</i> | Verbenaceae | Shrub |
| 172. | <i>Eclipta alba</i> | Asteraceae | Herb |
| 173. | <i>Eichhornia crassipes</i> | Pontederiaceae | Herb |
| 174. | <i>Elaeocarpus serratus</i> | Elaeocarpaceae | Tree |
| 175. | <i>Elesine indica</i> | Poaceae | Grass |
| 176. | <i>Emelia sonchifolia</i> | Asteraceae | Herb |
| 177. | <i>Eragrostis plumosa</i> | Poaceae | Grass |
| 178. | <i>Erythrina indica</i> | Fabaceae | Tree |
| 179. | <i>Eucalyptus tereticornis</i> | Myrtaceae | Tree |
| 180. | <i>Euphorbia geniculata</i> | Euphorbiaceae | Herb |
| 181. | <i>Euphorbia hirta</i> | Euphorbiaceae | Herb |
| 182. | <i>Euphorbia tirucalli</i> | Euphorbiaceae | Tree |
| 183. | <i>Excoecaria agallocha</i> | Euphorbiaceae | Tree |
| 184. | <i>Excoecaria indica</i> | Euphorbiaceae | Tree |
| 185. | <i>Ficus auriculata</i> | Moraceae | Tree |
| 186. | <i>Ficus benghalensis</i> | Moraceae | Tree |
| 187. | <i>Ficus benjamina</i> var. <i>benjamina</i> | Moraceae | Tree |
| 188. | <i>Ficus benjamina</i> var. <i>varigata</i> | Moraceae | Tree |
| 189. | <i>Ficus callosa</i> | Moraceae | Tree |
| 190. | <i>Ficus carica</i> | Moraceae | Tree |
| 191. | <i>Ficus elastica</i> | Moraceae | Tree |
| 192. | <i>Ficus exasperata</i> | Moraceae | Tree |
| 193. | <i>Ficus hispida</i> | Moraceae | Tree |
| 194. | <i>Ficus nervosa</i> | Moraceae | Tree |
| 195. | <i>Ficus pumila</i> | Moraceae | Climber |
| 196. | <i>Ficus religiosa</i> | Moraceae | Tree |
| 197. | <i>Ficus tinctoria</i> ssp. <i>parasitica</i> | Moraceae | Tree |
| 198. | <i>Filicium decipiens</i> | Sapindaceae | Tree |
| 199. | <i>Fimbristylis argentea</i> | Cyperaceae | Herb |
| 200. | <i>Fimbristylis complanata</i> | Cyperaceae | Herb |

| Sl. No. | Name of the Plant | Family | Habit |
|---------|-----------------------------------|------------------|---------|
| 201. | <i>Fimbristylis dichotoma</i> | Cyperaceae | Herb |
| 202. | <i>Fimbristylis tetragona</i> | Cyperaceae | Herb |
| 203. | <i>Garcinia gummi-gutta</i> | Clusiaceae | Tree |
| 204. | <i>Gliricidia sepium</i> | Fabaceae | Tree |
| 205. | <i>Glochidion</i> sp. | Euphorbiaceae | Tree |
| 206. | <i>Gmelina arborea</i> | Verbenaceae | Tree |
| 207. | <i>Grevillea robusta</i> | Proteaceae | Tree |
| 208. | <i>Guettarda speciosa</i> | Rubiaceae | Tree |
| 209. | <i>Hamelia patens</i> | Rubiaceae | Shrub |
| 210. | <i>Hardwickia binata</i> | Caesalpiniaceae | Tree |
| 211. | <i>Helicornia rostrata</i> | Helicorniaceae | Herb |
| 212. | <i>Helicteres isora</i> | Sterculiaceae | Shrub |
| 213. | <i>Heliotropium indicum</i> | Boraginaceae | Herb |
| 214. | <i>Hibiscus rosa-sinensis</i> | Malvaceae | Tree |
| 215. | <i>Hibiscus surretensis</i> | Malvaceae | Shrub |
| 216. | <i>Hibiscus tiliaceous</i> | Malvaceae | Tree |
| 217. | <i>Hibiscus vitifolius</i> | Malvaceae | Shrub |
| 218. | <i>Holarrhena antidysenterica</i> | Apocynaceae | Shrub |
| 219. | <i>Holoptelea integrifolia</i> | Ulmaceae | Tree |
| 220. | <i>Hydrilla verticillata</i> | Hydrocharitaceae | Herb |
| 221. | <i>Hygrophila auriculata</i> | Acanthaceae | Herb |
| 222. | <i>Imperata cylindrica</i> | Poaceae | Grass |
| 223. | <i>Ionidium suffruticosum</i> | Violaceae | Herb |
| 224. | <i>Ipomoea alba</i> | Convolvulaceae | Climber |
| 225. | <i>Ipomoea aquatica</i> | Convolvulaceae | Climber |
| 226. | <i>Ipomoea biloba</i> | Convolvulaceae | Climber |
| 227. | <i>Ipomoea carnea</i> | Convolvulaceae | Shrub |
| 228. | <i>Ipomoea muricata</i> | Convolvulaceae | Climber |
| 229. | <i>Ipomoea pescarpae</i> | Convolvulaceae | Climber |
| 230. | <i>Ixora coccinia</i> | Rubiaceae | Tree |
| 231. | <i>Jatropha curcas</i> | Euphorbiaceae | Shrub |
| 232. | <i>Justicia betonica</i> | Acanthaceae | Shrub |
| 233. | <i>Justicia procumbens</i> | Acanthaceae | Herb |
| 234. | <i>Kandelia candel</i> | Rhizophoraceae | Tree |
| 235. | <i>Kleinhovia hospita</i> | Sterculiaceae | Tree |
| 236. | <i>Lagerstroemia indica</i> | Lythraceae | Tree |
| 237. | <i>Lagerstroemia microcarpa</i> | Lythraceae | Tree |
| 238. | <i>Lagerstroemia reginae</i> | Lythraceae | Tree |
| 239. | <i>Lannea coromandelica</i> | Anacardiaceae | Tree |
| 240. | <i>Lantana camara</i> | Verbenaceae | Shrub |
| 241. | <i>Lawsonia inermis</i> | Lythraceae | Tree |

| Sl. No. | Name of the Plant | Family | Habit |
|---------|---------------------------------|------------------|---------|
| 242. | <i>Leanotis nepetiifolia</i> | Lamiaceae | Herb |
| 243. | <i>Leea indica</i> | Leeaceae | Tree |
| 244. | <i>Lemna minor</i> | Lemnaceae | Herb |
| 245. | <i>Leucanea leucocephala</i> | Mimosaceae | Tree |
| 246. | <i>Leucas aspera</i> | Lamiaceae | Herb |
| 247. | <i>Lindernia antipoda</i> | Scrophulariaceae | Herb |
| 248. | <i>Lindernia oppositifolia</i> | Scrophulariaceae | Herb |
| 249. | <i>Ludwigia parviflora</i> | Onagraceae | Herb |
| 250. | <i>Ludwigia peruviana</i> | Onagraceae | Herb |
| 251. | <i>Lumnitzera racemosa</i> | Combretaceae | Shrub |
| 252. | <i>Macaranga peltata</i> | Euphorbiaceae | Tree |
| 253. | <i>Madhuca longifolia</i> | Sapotaceae | Tree |
| 254. | <i>Mallotus philippensis</i> | Euphorbiaceae | Tree |
| 255. | <i>Mangifera indica</i> | Anacardiaceae | Tree |
| 256. | <i>Manihot esculenta</i> | Euphorbiaceae | Tree |
| 257. | <i>Manihot glaziovii</i> | Euphorbiaceae | Tree |
| 258. | <i>Manilkara hexandra</i> | Sapotaceae | tree |
| 259. | <i>Mariscus squarossus</i> | Cyperaceae | Herb |
| 260. | <i>Melaleuca leucodendron</i> | Myrtaceae | Tree |
| 261. | <i>Melastoma malabathrum</i> | Melastomataceae | Herb |
| 262. | <i>Melia azedarach</i> | Meliaceae | Tree |
| 263. | <i>Michelia champaca</i> | Annonaceae | Tree |
| 264. | <i>Micrococca mercurialis</i> | Euphorbiaceae | Herb |
| 265. | <i>Millingtonia hortensis</i> | Bignoniaceae | Tree |
| 266. | <i>Mimosa pudica</i> | Mimosaceae | Herb |
| 267. | <i>Mimusops elengi</i> | Sapotaceae | Tree |

Appendix ii List of medicinal plants recorded during the present study period

| Sl.No. | Name of the species | Family | Habit |
|--------|----------------------------------|------------------|-----------|
| 1. | <i>Abrus precatorius</i> | Fabaceae | Straggler |
| 2. | <i>Abutilon indicum</i> | Malvaceae | Shrub |
| 3. | <i>Acanthus ilicifolius</i> | Acanthaceae | Shrub |
| 4. | <i>Adenanthera pavoniana</i> | Mimosaceae | Tree |
| 5. | <i>Adhatoda vasica</i> | Acanthaceae | Shrub |
| 6. | <i>Adina cordifolia</i> | Rubiaceae | Tree |
| 7. | <i>Aegle marmelos</i> | Rutaceae | Tree |
| 8. | <i>Ailanthus excelsa</i> | Simaroubaceae | Tree |
| 9. | <i>Alstonia scholaris</i> | Apocynaceae | Tree |
| 10. | <i>Alternanthera sessilis</i> | Amaranthaceae | Herb |
| 11. | <i>Anamirta cocculus</i> | Menispermaceae | Climber |
| 12. | <i>Annona muricata</i> | Annonaceae | Tree |
| 13. | <i>Anthocephalus cadamba</i> | Rubiaceae | Tree |
| 14. | <i>Aristolochia indica</i> | Aristolochiaceae | Climber |
| 15. | <i>Aristolochia tagala</i> | Aristolochiaceae | Climber |
| 16. | <i>Artocarpus hirsutus</i> | Moraceae | Tree |
| 17. | <i>Asparagus racemosus</i> | Asparagaceae | Straggler |
| 18. | <i>Averrhoa bilimbi</i> | Averrhoaceae | Tree |
| 19. | <i>Averrhoa carambola</i> | Averrhoaceae | Tree |
| 20. | <i>Azadirachta indica</i> | Meliaceae | Tree |
| 21. | <i>Bacopa monnieri</i> | Scrophulariaceae | Herb |
| 22. | <i>Blumea lacera</i> | Asteraceae | Herb |
| 23. | <i>Boerhavia diffusa</i> | Nyctaginaceae | Herb |
| 24. | <i>Bombax malabaricum</i> | Bombacaceae | Tree |
| 25. | <i>Bridelia crenulata</i> | Euphorbiaceae | Tree |
| 26. | <i>Butea monosperma</i> | Fabaceae | Tree |
| 27. | <i>Cadaba indica</i> | Capparidaceae | Straggler |
| 28. | <i>Caesalpinia bonduc</i> | Caesalpiniaceae | Shrub |
| 29. | <i>Caesalpinia sappan</i> | Caesalpiniaceae | Shrub |
| 30. | <i>Calophyllum inophyllum</i> | Clusiaceae | Tree |
| 31. | <i>Cardiospermum halicacabum</i> | Sapindaceae | Climber |
| 32. | <i>Carissa carandas</i> | Apocynaceae | Straggler |
| 33. | <i>Cassia auriculata</i> | Caesalpiniaceae | Shrub |
| 34. | <i>Cassia fistula</i> | Fabaceae | Tree |
| 35. | <i>Cassia occidentalis</i> | Caesalpiniaceae | Herb |
| 36. | <i>Cassia siamea</i> | Caesalpiniaceae | Tree |
| 37. | <i>Cassia tora</i> | Caesalpiniaceae | Herb |
| 38. | <i>Cassytha filiformis</i> | Lauraceae | Climber |

| Sl.No. | Name of the species | Family | Habit |
|--------|---|----------------|-----------|
| 39. | <i>Cayratia pedata</i> | Vitaceae | Climber |
| 40. | <i>Chasalia curviflora</i> var. <i>ophioxylodes</i> | Rubiaceae | Herb |
| 41. | <i>Clerodendrum inerme</i> | Verbenaceae | Shrub |
| 42. | <i>Clerodendrum viscosum</i> | Verbenaceae | Shrub |
| 43. | <i>Coccinia grandis</i> | Cucurbitaceae | Climber |
| 44. | <i>Coix lacryma-jobi</i> | Poaceae | Grass |
| 45. | <i>Commelina clavata</i> | Commelinaceae | Herb |
| 46. | <i>Commelina longifolia</i> | Commelinaceae | Herb |
| 47. | <i>Cordia obliqua</i> | Boraginaceae | Tree |
| 48. | <i>Costos speciosus</i> | Costaceae | Herb |
| 49. | <i>Couroupita guianensis</i> | Lecythidaceae | Tree |
| 50. | <i>Crotalaria verrucosa</i> | Fabaceae | Shrub |
| 51. | <i>Croton hirtum</i> | Euphorbiaceae | Herb |
| 52. | <i>Curculigo orchiioides</i> | Hypoxidaceae | Herb |
| 53. | <i>Cuscuta reflexa</i> | Convolvulaceae | Climber |
| 54. | <i>Cymbopogon citratus</i> | Poaceae | Grass |
| 55. | <i>Cynodon dactylon</i> | Poaceae | Grass |
| 56. | <i>Dalbergia latifolia</i> | Fabaceae | Tree |
| 57. | <i>Derris scandens</i> | Fabaceae | Straggler |
| 58. | <i>Derris trifoliata</i> | Fabaceae | Straggler |
| 59. | <i>Dioscorea batatas</i> | Dioscoriaceae | Climber |
| 60. | <i>Diospyros microphyllus</i> | Ebenaceae | Tree |
| 61. | <i>Diospyros peregrina</i> | Ebenaceae | Tree |
| 62. | <i>Drypetes roxburghii</i> | Euphorbiaceae | Tree |
| 63. | <i>Eclipta alba</i> | Asteraceae | Herb |
| 64. | <i>Elaeocarpus serratus</i> | Elaeocarpaceae | Tree |
| 65. | <i>Erythrina indica</i> | Fabaceae | Tree |
| 66. | <i>Euphorbia hirta</i> | Euphorbiaceae | Herb |
| 67. | <i>Euphorbia tirucalli</i> | Euphorbiaceae | Tree |
| 68. | <i>Excoecaria agallocha</i> | Euphorbiaceae | Tree |
| 69. | <i>Excoecaria indica</i> | Euphorbiaceae | Tree |
| 70. | <i>Ficus auriculata</i> | Moraceae | Tree |
| 71. | <i>Ficus benghalensis</i> | Moraceae | Tree |
| 72. | <i>Ficus callosa</i> | Moraceae | Tree |
| 73. | <i>Ficus exasperata</i> | Moraceae | Tree |
| 74. | <i>Ficus hispida</i> | Moraceae | Tree |
| 75. | <i>Ficus nervosa</i> | Moraceae | Tree |
| 76. | <i>Ficus religiosa</i> | Moraceae | Tree |
| 77. | <i>Ficus tinctoria</i> ssp. <i>parasitica</i> | Moraceae | Tree |

| Sl.No. | Name of the species | Family | Habit |
|--------|-----------------------------------|-----------------|---------|
| 78. | <i>Filicium decipiens</i> | Sapindaceae | Tree |
| 79. | <i>Garcinia gummi-gutta</i> | Clusiaceae | Tree |
| 80. | <i>Gmelina arborea</i> | Verbenaceae | Tree |
| 81. | <i>Guettarda speciosa</i> | Rubiaceae | Tree |
| 82. | <i>Hardwickia binata</i> | Caesalpiniaceae | Tree |
| 83. | <i>Helicteres isora</i> | Sterculiaceae | Shrub |
| 84. | <i>Holarrhena antidysenterica</i> | Apocynaceae | Shrub |
| 85. | <i>Hygrophila auriculata</i> | Acanthaceae | Herb |
| 86. | <i>Imperata cylindrica</i> | Poaceae | Grass |
| 87. | <i>Ionidium suffruticosum</i> | Violaceae | Herb |
| 88. | <i>Jatropha curcas</i> | Euphorbiaceae | Shrub |
| 89. | <i>Justicia betonica</i> | Acanthaceae | Shrub |
| 90. | <i>Justicia procumbens</i> | Acanthaceae | Herb |
| 91. | <i>Kandelia candel</i> | Rhizophoraceae | Tree |
| 92. | <i>Kleinhovia hospita</i> | Sterculiaceae | Tree |
| 93. | <i>Lannea coromandelica</i> | Anacardiaceae | Tree |
| 94. | <i>Lawsonia inermis</i> | Lythraceae | Tree |
| 95. | <i>Leanotis nepetifolia</i> | Lamiaceae | Herb |
| 96. | <i>Leea indica</i> | Leeaceae | Tree |
| 97. | <i>Leucas aspera</i> | Lamiaceae | Herb |
| 98. | <i>Macaranga peltata</i> | Euphorbiaceae | Tree |
| 99. | <i>Madhuca longifolia</i> | Sapotaceae | Tree |
| 100. | <i>Mallotus philippensis</i> | Euphorbiaceae | Tree |
| 101. | <i>Mangifera indica</i> | Anacardiaceae | Tree |
| 102. | <i>Manilkara hexandra</i> | Sapotaceae | tree |
| 103. | <i>Michelia champaca</i> | Annonaceae | Tree |
| 104. | <i>Micrococca mercurialis</i> | Euphorbiaceae | Herb |
| 105. | <i>Mimusops elengi</i> | Sapotaceae | Tree |
| 106. | <i>Morinda citrifolia</i> | Rubiaceae | Tree |
| 107. | <i>Morinda tinctoria</i> | Rubiaceae | Tree |
| 108. | <i>Mukia maderaspatana</i> | Cucurbitaceae | Climber |
| 109. | <i>Murraya paniculata</i> | Rutaceae | Shrub |
| 110. | <i>Myristica fragrans</i> | Myristicaceae | Tree |
| 111. | <i>Pavonia procumbens</i> | Malvaceae | Herb |
| 112. | <i>Pavonia zeylanica</i> | Malvaceae | Herb |
| 113. | <i>Phoenix laurierii</i> | Arecaceae | Tree |
| 114. | <i>Phyla nodiflora</i> | Verbenaceae | Herb |
| 115. | <i>Phyllanthus amarus</i> | Euphorbiaceae | Herb |
| 116. | <i>Phyllanthus emblica</i> | Euphorbiaceae | Tree |

| Sl.No. | Name of the species | Family | Habit |
|--------|-----------------------------------|------------------|---------|
| 117. | <i>Phyllanthus reticulatus</i> | Euphorbiaceae | Shrub |
| 118. | <i>Piper longum</i> | Piperaceae | Climber |
| 119. | <i>Piper nigrum</i> | Piperaceae | Climber |
| 120. | <i>Pisonia alba</i> | Nyctaginaceae | Tree |
| 121. | <i>Pistia stratiotes</i> | Araceae | Herb |
| 122. | <i>Pongamia pinnata</i> | Fabaceae | Tree |
| 123. | <i>Premna serratifolia</i> | Verbenaceae | Tree |
| 124. | <i>Pterocarpus marsupium</i> | Fabaceae | Tree |
| 125. | <i>Santalum album</i> | Santalaceae | Tree |
| 126. | <i>Sapindus emarginatus</i> | Sapindaceae | Tree |
| 127. | <i>Saraca asoka</i> | Fabaceae | Tree |
| 128. | <i>Scaevola taccada</i> | Goodeniaceae | Shrub |
| 129. | <i>Scoparia dulcis</i> | Scrophulariaceae | Herb |
| 130. | <i>Solanum torvum</i> | Solanaceae | Tree |
| 131. | <i>Sphearanthus indicus</i> | Asteraceae | Herb |
| 132. | <i>Spondias pinnata</i> | Anacardiaceae | Tree |
| 133. | <i>Stachytarpheta jamaicensis</i> | Verbenaceae | Herb |
| 134. | <i>Stemodia viscosa</i> | Scrophulariaceae | Herb |
| 135. | <i>Streblus asper</i> | Moraceae | Tree |
| 136. | <i>Strychnos nux-vomica</i> | Loganiaceae | Tree |
| 137. | <i>Swietenia macrophylla</i> | Meliaceae | Tree |
| 138. | <i>Swietenia mahogani</i> | Meliaceae | Tree |
| 139. | <i>Synedrella nodiflora</i> | Asteraceae | Herb |
| 140. | <i>Syzygium cumini</i> | Myrtaceae | Tree |
| 141. | <i>Terminalia bellirica</i> | Combretaceae | Tree |
| 142. | <i>Terminalia crenulata</i> | Combretaceae | Tree |
| 143. | <i>Terminalia paniculata</i> | Combretaceae | Tree |
| 144. | <i>Thespesia populnea</i> | Malvaceae | Tree |
| 145. | <i>Thespesia populneoides</i> | Malvaceae | Tree |
| 146. | <i>Thottea siliquosa</i> | Aristolochiaceae | Shrub |
| 147. | <i>Tiliacora acuminata</i> | Menispermaceae | Climber |
| 148. | <i>Tridax procumbens</i> | Asteraceae | Herb |
| 149. | <i>Vateria indica</i> | Dipterocarpaceae | Tree |
| 150. | <i>Vernonia cinerea</i> | Asteraceae | Herb |
| 151. | <i>Vetiveria zizanioides</i> | Poaceae | Grass |
| 152. | <i>Vitex altissima</i> | Verbenaceae | Tree |
| 153. | <i>Vitex negundo</i> | Verbenaceae | Tree |
| 154. | <i>Wedelia chinensis</i> | Asteraceae | Herb |
| 155. | <i>Wedelia urticaefolia</i> | Asteraceae | Herb |

| Sl.No. | Name of the species | Family | Habit |
|--------|---------------------------|-------------|-------|
| 156. | <i>Wrightia arborea</i> | Apocynaceae | Tree |
| 157. | <i>Wrightia tinctoria</i> | Apocynaceae | Tree |
| 158. | <i>Xylia xylocarpa</i> | Mimosaceae | Tree |
| 159. | <i>Zanthoxylum rhetsa</i> | Rutaceae | Tree |

Appendix iii List of ornamental plants recorded in the study area

| Sl. No. | Name of the plant species | Family | Habit |
|---------|----------------------------------|-----------------|-----------|
| 1. | <i>Acacia auriculiformis</i> | Mimosaceae | Tree |
| 2. | <i>Acacia mangium</i> | Mimosaceae | Tree |
| 3. | <i>Adhatoda vasica</i> | Acanthaceae | Shrub |
| 4. | <i>Allamanda cathartica</i> | Apocynaceae | Straggler |
| 5. | <i>Antigonon leptopus</i> | Polygonaceae | Climber |
| 6. | <i>Araucaria columnaris</i> | Araucariaceae | Tree |
| 7. | <i>Bambusa vulgaris</i> | Poaceae | Grass |
| 8. | <i>Bauhinia purpurea</i> | Caesalpiniaceae | Tree |
| 9. | <i>Bauhinia tomentosa</i> | Caesalpiniaceae | Shrub |
| 10. | <i>Bixa orellana</i> | Bixaceae | Shrub |
| 11. | <i>Bougainvillea spectabilis</i> | Nyctaginaceae | Straggler |
| 12. | <i>Bruguiera gymnorhiza</i> | Rhizophoraceae | Tree |
| 13. | <i>Butea monosperma</i> | Fabaceae | Tree |
| 14. | <i>Caesalpinia sappan</i> | Caesalpiniaceae | Shrub |
| 15. | <i>Caesalpinia coriaria</i> | Caesalpiniaceae | Tree |
| 16. | <i>Callistemon lanceolatus</i> | Myrtaceae | Tree |
| 17. | <i>Calophyllum inophyllum</i> | Clusiaceae | Tree |
| 18. | <i>Canna indica</i> | cannaceae | Herb |
| 19. | <i>Cassia alata</i> | Caesalpiniaceae | Shrub |
| 20. | <i>Cyrtostachys renda</i> | Arecaceae | Tree |
| 21. | <i>Digitalis purpurea</i> | Plantaginaceae | Herb |
| 22. | <i>Diospyros microphyllus</i> | Ebenaceae | Tree |
| 23. | <i>Duranta repens</i> | Verbenaceae | Shrub |
| 24. | <i>Ficus elastica</i> | Moraceae | Tree |
| 25. | <i>Ficus pumila</i> | Moraceae | Climber |
| 26. | <i>Grevillea robusta</i> | Proteaceae | Tree |
| 27. | <i>Hamelia patens</i> | Rubiaceae | Shrub |
| 28. | <i>Heliconia rostrata</i> | Heliconiaceae | Herb |
| 29. | <i>Hibiscus rosa-sinensis</i> | Malvaceae | Tree |
| 30. | <i>Ixora coccinia</i> | Rubiaceae | Tree |
| 31. | <i>Lagerstroemia indica</i> | Lythraceae | Tree |
| 32. | <i>Lagerstroemia reginae</i> | Lythraceae | Tree |

| Sl. No. | Name of the plant species | Family | Habit |
|---------|-----------------------------------|---------------|---------|
| 33. | <i>Lawsonia inermis</i> | Lythraceae | Tree |
| 34. | <i>Melaleuca leucodendron</i> | Myrtaceae | Tree |
| 35. | <i>Millingtonia hortensis</i> | Bignoniaceae | Tree |
| 36. | <i>Murraya paniculata</i> | Rutaceae | Shrub |
| 37. | <i>Mussanda sp.</i> | Rubiaceae | Shrub |
| 38. | <i>Nerium oleander</i> | Apocynaceae | Shrub |
| 39. | <i>Nyctanthes arbor-tristis</i> | Oleaceae | Tree |
| 40. | <i>Pandanus odoratissimus</i> | Pandanaceae | Tree |
| 41. | <i>Plumeria acuminata</i> | Apocynaceae | Tree |
| 42. | <i>Plumeria alba</i> | Apocynaceae | Tree |
| 43. | <i>Plumeria rubra</i> | Apocynaceae | Tree |
| 44. | <i>Quisqualis indica</i> | Combretaceae | Climber |
| 45. | <i>Raphidophora aurea</i> | Araceae | Climber |
| 46. | <i>Raphidophora pertusa</i> | Araceae | Climber |
| 47. | <i>Ravenala madagascariensis</i> | Streliziaceae | Tree |
| 48. | <i>Spathoglottis plicata</i> | Orchidaceae | Herb |
| 49. | <i>Syzygium malaccense</i> | Myrtaceae | Tree |
| 50. | <i>Syzygium samarangense</i> | Myrtaceae | Tree |
| 51. | <i>Tabernaemontana divaricata</i> | Apocynaceae | Shrub |
| 52. | <i>Tabebuia argentea</i> | Bignoniaceae | Tree |
| 53. | <i>Tabebuia rosea</i> | Bignoniaceae | Tree |
| 54. | <i>Tagetes erecta</i> | Asteraceae | Herb |
| 55. | <i>Wedelia chinensis</i> | Asteraceae | Herb |
| 56. | <i>Wedelia urticaefolia</i> | Asteraceae | Herb |
